

MOBILE CONVERSION AUDIT · PRODUCT & COLLECTION PAGES

What to change, *and what to change it to.*

A line-by-line audit of the PawLunova product page and collection page on mobile, built from your store data, your live pages, ten competitors, around 300 competitor customer reviews and the research on how people buy online.

2.16%

Mobile conversion now
13 orders from 602 sessions

5.6%

Mobile sessions that add to
basket. This is the leak.

38%

Of mobile shoppers who add
to basket go on to buy

5%

Target. What it takes is set out
in Section 1.

Scope: mobile only · product detail pages and collection pages · Shopify data from the new store's first nine days, 2–10 Oct 2026 · live pages read 10 Oct 2026 · 10 competitor sites · ~300 third-party reviews (Trustpilot, Feefo, zooplus) · 19 UK owner forum threads · 40+ research, benchmark and UK legal sources.

Inside this audit

01	The short version	Where you stand, what 5% takes, the ten biggest wins	3
02	Your numbers	Funnel by device, landing pages, benchmarks	5
03	Fix first: the 72-hour list	Claims and promises that cost trust, money or a payment account	7
04	Product page audit	26 findings, top to bottom, on a phone	10
05	The new product page	Wireframe, full Coniston rewrite, template rules	16
06	Collection page audit	15 findings, top to bottom, on a phone	20
07	The new collection page	Wireframe, copy, filters, sort order	24
08	What competitors do	10 brands: what to copy, exploit and avoid	26
09	What their customers say	Their words, their complaints, the gaps you fill	28
10	Psychology playbook	16 levers: who uses them, and the stronger true version	32
11	The reviews engine	Getting genuine reviews fast, and using them well	34
12	Photos, video and price presentation	Shot list per bed, pricing levers that are not price cuts	35
13	Implementation plan	Day by day, Shopify Horizon steps, metafields	37
14	Measuring it	Weekly scorecard, targets, what to watch	39
15	Appendix	Claims audit of all 37 beds, naming fixes, sources, limits	40

How to read this

- **Mobile only.** Product detail pages (PDP) and collection pages. Checkout, homepage and ads are out of scope, except where they break a promise made on these pages.
- **Every finding is written as Now → Change to**, with the exact wording to use. Recommended copy follows your house style: British spelling, no em dashes, whole-pound prices ending in 9.
- **Priority:** PO within 72 hours (trust, legal or payment risk) · P1 within 2 weeks · P2 within 6 weeks · P3 later.
- **Impact** is High, Medium or Low based on the evidence cited. **Effort:** S under an hour, M half a day, L a day or more.
- **Evidence tags** like B3 point to the numbered source list in the appendix. Figures were checked on the source page on 10 Oct 2026.
- **Store data** comes from your Shopify analytics and Admin. The new store has been live since 2 Oct, so 13 mobile orders is a small sample: treat the funnel as direction, not proof.
- **Limits:** no phone screenshots (the browser was declined and this workspace can't load your site), so layout points are inferred from the live page code in order. Reddit and Amazon block automated reading, so community research uses Mumsnet and MoneySavingExpert threads instead.

The short version

Your pages are well written. They are losing sales at one step, and a handful of claims on them are a risk to the business. Both are fixable.

2.16%

Mobile conversion since the new store went live, 2–10 Oct (13 orders, 602 sessions)

5.6%

Mobile sessions that add to basket (34). Shopify median is 6.8% [A3]

38%

Of mobile shoppers who add to basket go on to buy (13 of 34)

5%

Your target. Above the Shopify top 10% for mobile (4.0%) [A2]

WHERE YOU STAND

Mobile is 60% of your sessions and 13 of your 15 orders. At 2.16% you already beat the Shopify median for mobile (1.5%) but sit below the top 20% (2.9%) and top 10% (4.0%) [A2]. The UK pet care average across all devices is 2.56% [A5]. Desktop converts at 0.52%, but it is out of scope here.

THE LEAK IS THE FIRST STEP

Once someone adds a bed to their basket, 71% reach checkout and 54% of those pay. That part works. The problem is getting the add: 94 in every 100 mobile sessions leave without adding anything. That is the job of the product page and the collection page, which is exactly what this audit covers.

Your worst page is the orthopaedic collection: 71 mobile sessions, 1 add to basket (1.4%). Your homepage, with four hand-picked beds, "Best for" tags and the Bed Finder, got 9 adds from 117 sessions (7.7%) and 4 orders. The difference is curation. The collection shows 37 beds, opens with £179 to £239 beds, and every card carries a long guarantee price line with its maths underneath, plus an "Only 5 left" line.

What 5% takes

Conversion = add-to-basket rate × the share who then buy.

Route	Add rate	Then buy	CR
Today	5.6%	38%	2.2%
Route A	13%	38%	4.9%
Route B	11%	45%	5.0%

Route B is the realistic one. An 11 to 13% add rate is the Shopify top-20% band (12%) [A3]. Moving "then buy" from 38% to 45% means checkout completion going from 54% to about 64%: a second payment method with pay-in-3, and delivery dates people can trust.

The honest bit

5% on mobile is beyond the Shopify top 10%. Page changes alone will not get you there; genuine reviews and your own photos will. Expect about 3.5% within six weeks of the PO and P1 fixes, and 4 to 5% once 30 or more genuine reviews are live. Watch add-to-basket rate weekly: at about 80 mobile sessions a day, orders are still too few to read week to week.

Fix these first (Section 03)

Seven things on your live pages are untrue, contradict your own policies, or look fake. Each costs conversion; some could cost you your payment account, which after Worldpay is the most expensive mistake available.

- "4.8 from 3,900 reviews"** on the homepage, a "4.8" on the collection page and "3,900+ Bed Owners" on Our Story, with no review text anywhere and 15 orders in the new store's first nine days. Remove until genuine reviews exist.
- "Only 5 left"** on all 37 orthopaedic beds. Every variant in Shopify is set to 3 to 5 units. Turn the message off unless the number is real.
- "Order by 3pm Mon–Fri for same-day dispatch, delivery 1–3 working days"** against a shipping policy of 1 to 2 working days to dispatch plus 4 to 6 working days to deliver, with some beds shipped by partners. One honest promise, everywhere.
- 5-year guarantee price maths on 14 beds that are not memory foam**, although your refund policy only guarantees beds described as memory foam. Glaramara's buy box also claims memory foam and a waterproof liner; its description says neither.

- 5 **The chat widget greets UK shoppers in Spanish** ("¿Necesitas ayuda?").
- 6 **Em dashes and copy bugs** on every card and page ("— How we worked this out", "Rated 4.8/5 by By 3,900+ Bed Owners owners").
- 7 **Size labels that break on cards:** "Sizes XL–Large", "Medium–Extra", "Medium:–Large:".

The ten biggest wins after that

#	Change	Where	Impact	Priority
1	Put a curated "Start with how they sleep" row of four beds at the top of the collection, copying what already works on your homepage	Collection	High	P1
2	Clean the collection cards: image, "Best for" tag, title, price without pence, sizes in cm, three spec chips. Remove the price maths and stock lines	Collection	High	P1
3	Real filters: dog weight, how they sleep, memory foam or egg-crate, waterproof liner, low entry, shape	Collection	High	P1
4	Drive every claim from product data (metafields or a second template), so each bed only shows what it really has	Both	High	P0
5	A "What's inside" spec card on every PDP: core, depth per size, firmness, liner, cover, base, step-in height, sleeping area. No competitor does this properly	PDP	High	P1
6	Tighten the buy box: £109 not £109.00, a one-line per-night figure, sleeping area on size cards, a dated delivery line, one trust row	PDP	High	P1
7	Start the reviews engine this week: request at day 14, photo prompt, a thank-you for any rating, 10 to 15 disclosed seeded beds	Both	Very high	P1
8	Own photos and a 15-second video for the six beds that get traffic: eight images each, real dogs, in-scale, cut-away	Both	High	P2
9	A second payment route with pay-in-3 (PayPal or Klarna) alongside Revolut, shown in the buy box with the provider's own widget	PDP	Med-High	P2
10	Spare covers and dog stairs as add-ons in the buy box: covers are the top complaint about competitors, and stairs suit the same stiff dogs	PDP	Medium	P2

Keep these. They beat every competitor we looked at

- **The 100-night trial with free collection, slept-on.** Only Omlet comes close (180 days, free returns). At least five of nine UK competitors make customers pay return postage, and four only allow 14 days.
- **Size cards with breed and weight.** Only George Barclay pairs breed with a weight band; three competitors give dimensions only and one gives nothing.
- **Stating foam density.** None of the ten competitors publishes a density figure. Keep it, but only on beds where a supplier spec sheet backs it.
- **Low-entry and lowered-front beds** (Coniston, Newlands, Easedale, Burnmoor). Forum owners of stiff dogs ask for exactly this.
- **"A bed is for comfort. It is not a treatment."** Honest, compliant, and rare in the category.
- **Copy that sounds like an owner, not a brand.** Lines like "the pause at the bottom of the stairs" are better than anything in the competitor set. The fixes here are about structure and proof, not voice.

Your numbers

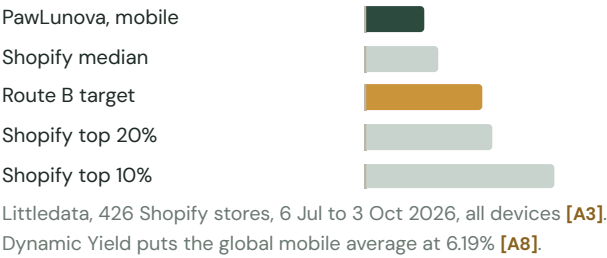

Shopify analytics for the new store, 2 to 10 October 2026 (live from 2 Oct). Benchmarks are the latest available, checked on 10 Oct.

FUNNEL BY DEVICE

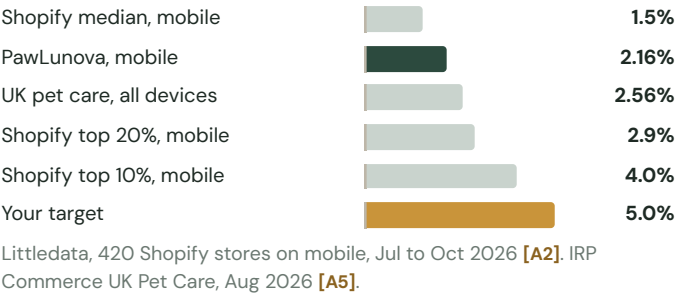

Device	Sessions	Added to basket	Reached checkout	Ordered	Add rate	Conversion
Mobile	602	34	24	13	5.6%	2.16%
Desktop	387	11	6	2	2.8%	0.52%
Tablet	15	2	1	0	13%	0%
All	1,005	47	31	15	4.7%	1.49%

Mobile step by step: **5.6%** of sessions add to basket → **71%** of those reach checkout → **54%** of those pay. Mobile daily traffic runs at about 70 to 105 sessions on a normal day (5 Oct had 14).

Add-to-basket rate: you vs Shopify stores

Conversion rate: you vs benchmarks

WHERE MOBILE VISITORS LAND, AND WHAT THEY DO

Landing page (mobile)	Sessions	Added	Orders	Add rate	Read
Homepage	117	9	4	7.7%	Curated 4 beds + Bed Finder works
Orthopaedic collection	71	1	1	1.4%	Worst page. Section 06
Windermere Sherpa Nest (PDP)	58	3	0	5.2%	Traffic, no orders yet
Crummock Waterproof Nest (PDP)	44	3	2	6.8%	Best-converting PDP
Langdale Raised-Edge (PDP)	30	2	1	6.7%	
Keswick Raised Kennel (PDP)	26	0	0	0%	Off-core product
Henley Woven Canopy Day Bed (PDP)	25	1	0	4.0%	Off-core product
Nocturne Bolster (PDP)	16	2	0	12.5%	Small sample
Windermere Elevated (PDP)	15	0	0	0%	Off-core product
Grasmere Bolster Sofa (PDP)	10	2	1	20%	Best seller, little traffic

WHAT THIS TELLS US

- **Curation converts, lists don't.** Same traffic source, same brand: the homepage's four-bed edit adds at 7.7%, the 37-bed collection at 1.4%.
- **Product pages are mid-pack** (5 to 7% add rates). They need proof (reviews, photos, specs) more than redesign.
- **Grasmere and Ambleside are your sellers** (3 orders each, all devices) but get almost no landing traffic. Feature them first on the collection.

TRAFFIC SOURCE AND SALES

- **Search** (Google, paid and organic): 339 mobile sessions, 18 adds, 5 orders, 1.5%.
- **Direct** (includes returning visitors and untagged clicks): 259 sessions, 15 adds, 7 orders, 2.7%.
- **Orders by bed (all devices):** Grasmere 3, Ambleside 3, Crummock Waterproof Nest 2; Rosthwaite, Scafell, Esthwaite, Elterwater, Bassenthwaite, Langdale, Windermere Elevated, Nocturne, Troutbeck and Bowfell 1 each.

- **66 mobile sessions landed on kennel, day-bed and elevated pages for 1 add.** Out of scope here, but check whether PMax should be spending on them.
- **Average order value by bed (net)** ran from £69 (Troutbeck) to £184, with most between £114 and £164.

DAY BY DAY, MOBILE

Day	Sessions	Added	Orders
Fri 2 Oct (launch day)	8	0	0
Sat 3 Oct	85	7	2
Sun 4 Oct	93	4	1
Mon 5 Oct	14	2	2
Tue 6 Oct	70	8	2
Wed 7 Oct	101	4	1
Thu 8 Oct	76	3	3
Fri 9 Oct	105	5	1
Sat 10 Oct (to mid-afternoon)	64	2	2

Pulled slightly later than the totals above, so it sums to 616 sessions, 35 adds and 14 orders.

WHAT TO NOTICE

- **A normal day is 70 to 105 mobile sessions**, about 4 adds and 1 to 3 orders. That's the baseline to beat.
- **Monday 5 October had 14 sessions.** Worth checking whether ads paused or the site was down; a gap like that hides real performance.
- **Adds swing from 2 to 8 a day** on similar traffic. Judge changes on weekly totals, never on a single day.
- **Orders don't line up neatly with same-day adds** (Thu 8 Oct: 3 adds, 3 orders; Tue 6 Oct: 8 adds, 2 orders). Another reason to read weekly totals.

How to read small numbers

13 mobile orders can swing by a couple either way from luck alone. Two things are solid enough to act on: the collection's add rate is far below every other landing page, and the post-basket steps are healthy. The rest of this audit rests on research and competitor evidence, the right way to work at this volume.

Fix first: the 72-hour list

Seven problems on the live product and collection pages. Each one costs conversion today. Four of them could also cost you a fine, a wave of disputes, or your payment account.

Why these come before any redesign

Revolut went live on 3 Oct after reviewing your site. Worldpay ended over fulfilment delays and chargebacks, and Mollie and Airwallex both declined. A claim a customer can later call untrue (a stock count, a delivery promise, a guarantee) is exactly what turns into a dispute. Your own standing rules already ban fake review counts, fake urgency and unsubstantiated claims; these items are where the live site has drifted from them. Fix the leaks first, then optimise.

PO-1 A rating and review count with nothing behind it

PO

Effort S

NOW

Homepage hero and "Owner reviews": *"4.8 from 3,900 reviews"*. Our Story: *"Rated 4.8/5 by 3,900+ Bed Owners owners"*. Orthopaedic collection, under the H1: *"4.8"*. No review text appears anywhere and no product page has a review section. The new store took 15 orders in its first nine days.

CHANGE TO

Remove every rating and count until a review app holds genuine reviews. In their place on the homepage and collection header: **"We're a young UK brand, so there's no wall of reviews yet. That's why every bed comes with 100 nights at home, and free collection if it isn't right."** When a bed has 5+ genuine reviews, show the app's stars and count on that bed only. If 3,900 really are genuine reviews from the old store, import them into the app with their dates and products and let the app show the live figure.

Why: The DMCC Act 2024 bans fake reviews and presenting reviews in a misleading way, and the CMA can now fine up to 10% of global turnover [F1, F2]. Its guidance expects a published review policy and checks [F4]. Google only accepts genuine purchaser reviews and needs 50 across your catalogue before Shopping stars appear [F16, F17]. It also backfires: 96% of shoppers go looking for negative reviews and 46% distrust a perfect score [C5]. A big number with nothing to read behind it looks fake.

PO-2 "Only 5 left" on every bed

PO

Effort S

NOW

PDP buy box: *"Only 5 left in Small"*. All 37 orthopaedic collection cards carry "Only 5 left" or "Only 4 left" (Patterdale's reads *"Only 5 left in Medium: Springer Spaniel / Cockapoo / Staffie"*). In Shopify, every variant of the first 50 products is set to 3 to 5 units, with selling stopped at zero.

CHANGE TO

Switch off the low-stock text on the product page and on product cards. Set inventory to what you or your supplier can really ship, or turn off quantity tracking for partner-shipped beds so a size never shows sold out by accident. If you hold your own stock, show **"Low stock"** only at 3 or fewer real units.

Why: Falsely stating that something is only available in limited supply is a banned practice [F3]; the CMA made Wowcher tie "only 2 remaining" messages to real stock [F8]. With 5 units and selling stopped at zero, each size goes sold out after five orders: lost sales. And 37 cards saying the same thing is a pattern shoppers notice.

PO-3 A delivery promise your own policy contradicts

PO Effort M

NOW

Announcement bar and every buy box: "Order by 3pm Mon–Fri for same-day dispatch". Delivery accordion: "Delivery takes 1–3 working days once it's on its way." Shipping policy: dispatch "within 1 to 2 working days", standard delivery "within 4 to 6 working days" after that, and some items shipped by manufacturing partners "take longer". In the basket: an upsell product named "Next Day Delivery" (£4), though the policy offers no next-day service.

CHANGE TO

One promise, everywhere, set per bed. Own-stock beds that really leave the same day: "Order by 3pm and it's dispatched today. Arrives Tue 14 to Fri 17 Oct. Free delivery." Partner-shipped beds: "Ships from our partner warehouse. Arrives Mon 20 to Thu 23 Oct. Free, tracked delivery." (Example dates: work them out from each bed's real dispatch time plus 4 to 6 working days.) Drop "same-day dispatch" from the announcement bar unless it's true for every bed. Remove "Next Day Delivery" unless you can deliver next day, and fix the spelling either way.

Why: Delivery timescales are information you must give before the order [F15]. A page promising delivery within about 4 working days against a policy of up to 8 sets up "item not received" disputes, the reason Worldpay gave for ending your account. Done honestly it sells: "delivery too slow" is the second biggest reason shoppers abandon (20%) [A11], and 41% of sites don't show a delivery date at all [B12].

PO-4 Guarantee maths and memory-foam claims on beds that aren't memory foam

PO Effort S–M

NOW

All 37 orthopaedic cards show "about Xp a night over the 5-year guarantee". Your refund policy guarantees the core of beds "described as memory foam". By their own descriptions, **14 of the 37 are egg-crate or layered foam:** Scafell, Langdale, Nocturne, Bowfell, Esthwaite, Mungrisdale, Loughrigg, Honister, Glaramara, Braithwaite, Burnmoor, Easedale, Newlands, Patterdale. Glaramara's buy box also says "High-density memory foam that holds its shape", "Waterproof liner keeps accidents out of the foam" and "Backed by a 5-year guarantee on the foam"; its description has an egg-crate core and no liner. The 50kg/m³ block and the "In year five: still holding its shape, or we replace it" row show on every bed.

CHANGE TO

Make these blocks depend on product data (metafields, Section 13). No-code fix for today: duplicate the product template as **product.foam**, delete the guarantee line, per-night maths, 50kg/m³ block, liner bullet and "year five" row, and assign it to the 14 beds. Remove the per-night line from collection cards altogether. For egg-crate beds say: **"Profiled egg-crate foam core: spreads their weight so hips and shoulders aren't pressed into a hard floor."** Keep 50kg/m³ only where a supplier spec sheet says so, and keep the sheet on file.

Why: Promising a guarantee your policy doesn't give is a misleading claim [F2], and the CAP Code requires evidence before you publish an objective claim [F10]. A customer who reads "memory foam" and gets egg-crate has a "not as described" claim. It also blunts your best differentiator: owners distrust the word "orthopaedic" and check what's inside (Section 09). Full bed-by-bed table in the appendix.

PO-5 The chat widget speaks Spanish

PO Effort S

NOW

"¿Necesitas ayuda?" then "Hi! How can I help you?" on every page. The bubble sits bottom-right, where the sticky "Add to basket" bar sits on a phone.

CHANGE TO

Bubble: **"Size questions? Message Abbas"**. Opening message: **"Hi, I'm Abbas from PawLunova. Send me your dog's breed and weight, or a photo of them stretched out asleep, and I'll tell you honestly which size fits. I usually reply the same day."** Move the bubble bottom-left on product pages, or above the sticky bar. Only promise a reply time you can keep.

Why: A foreign-language greeting on a UK shop reads as a dropship front. A named person is a real edge: poor customer service is the most common complaint about competitors in our review sample (about 40 reviews, Section 09).

PO-6 Em dashes and copy bugs on every page

PO

Effort S

NOW

"about 6p a night over the 5-year guarantee — How we worked this out" (every PDP, all 37 cards). Footer: "real dogs and real homes — named for the Lakes", "Ask before you buy — we'd much rather help". Our Story: "Rated 4.8/5 by By 3,900+ Bed Owners owners". Kendal colour variants: "beige", "gray", "green".

CHANGE TO

"About 6p a night over the 5-year foam guarantee" with the maths behind a small (i). Footer: "Orthopaedic dog beds for real dogs and real homes. Named for the Lakes, built for real sleep." and "Ask before you buy. We'd much rather help you choose than arrange a return." Variants: Beige, Grey, Green.

PO-7 Size labels that break on cards

PO

Effort S

NOW

"Sizes XL–Large" (Ennerdale's variants run XL then Large). "Sizes Medium–Extra" (Ambleside's "Extra Large · 140 × 100cm"). "Sizes Large–Extra · 2 colours" (Nocturne). "Sizes Medium:–Large:" (Patterdale has breed names in its variant titles). Glenridding's sizes run Large, Medium, Small.

CHANGE TO

Order every bed's sizes small to large. One format everywhere, your standard: "XL · 140 × 100cm", never "Extra Large". Move breed names out of variant titles and into the size-card text. Cards then read "Sizes M–XL · 82–140cm". Full fix list in the appendix.

Product page audit

Top to bottom, as a phone shows it. Coniston Oval Memory Foam Bolster Dog Bed is the worked example; most findings apply to every bed because they share one template. PO items are in Section 03 and not repeated here.

ABOVE THE FOLD

PDP-01 Three bars and a breadcrumb before the product

P1

Impact Med

Effort S

NOW

A rotating announcement bar (four messages), the header, a gold promo bar ("*£15 off orders of £129 or more · ends Sat 31 Oct*") and a four-level breadcrumb come before the first image. From the page order, the title falls below the first screen, and the price and button sit on the second.

CHANGE TO

One static bar: **"Free UK delivery over £40 · 100 nights to decide · Free collection"**. Move the promotion into the buy box (PDP-07). On mobile, replace the breadcrumb with one back link: "**Orthopaedic dog beds**". Goal: image, title and price on screen one; sizes and the button on screen two.

Why: Rotating messages get missed, and one of the four is currently wrong (PO-3). Every bar pushes the price down. Baymard rates 62% of mobile product pages "mediocre or worse" [B1].

PDP-02 Too few images, and no video

P2

Impact High

Effort L

NOW

Coniston has 3 images, Haweswater 3, Glenridding 2. No bed has a video. Every image on a product shares one alt text ("*Coniston Oval Memory Foam Bolster Dog Bed - Pawlunova*"). Newer beds use supplier file names such as 2539914157919530681_1.jpg .

CHANGE TO

An 8-image gallery plus a 15-second video for every bed, starting with the six that sell or get traffic: Grasmere, Ambleside, Crummock Waterproof Nest, Langdale, Coniston, Nocturne. Order: **1** real dog settling on it at home · **2** the video · **3** in-scale shot with dimensions · **4** labelled cut-away · **5** step-in height · **6** cover unzipped, liner showing · **7** underside grip · **8** sizes side by side. A distinct alt text per image. Shot list in Section 12.

Why: In furniture and home, 79% of shoppers go to the images first, against 46% in general e-commerce [B5]. 42% try to judge size from images and 37% of sites still have no in-scale shot [B2, B3]. Supplier photos can also turn up on cheaper marketplace listings, which undercuts a premium page.

PDP-03 Title doesn't lead with what's different

P2

Impact Low-Med

Effort S

NOW

"*Coniston Oval Memory Foam Bolster Dog Bed*", three lines on a phone. Its real selling point, the low entry, isn't in it.

CHANGE TO

"Coniston Low-Entry Memory Foam Dog Bed". Same rule across the range: after the name, say who it's for or what's unique. "Ambleside Edge-to-Edge Memory Foam Dog Mattress" already does this well.

Why: Owners of stiff dogs ask for easy entry by name: 9 of 19 UK forum threads raised it (Section 09).

PDP-04 Subtitle copied between beds, and close to a health claim

P1

Impact Med

Effort S

NOW

Coniston and Glaramara both read *"Pressure-relieving support for ageing joints, under a cover you can actually wash."* Glaramara has no memory foam.

CHANGE TO

Coniston: **"A low step in for stiff legs, memory foam to settle into, and a cover that washes at 30°C."** One subtitle per bed, describing what it does physically. Patterns for each bed type are in Section O5.

Why: Health benefits for animals need robust evidence under the CAP Code, and treatment claims are reserved for licensed medicines [F11]. "Spreads their weight" can be shown; "relieves ageing joints" is a health claim.

PRICE AND OFFER

PDP-05 Prices shown with pence

P1

Impact Med

Effort S

NOW

"£109.00" in the price, on the button and on every size card.

CHANGE TO

"£109" everywhere. Settings › General › Store currency › Change formatting, using `{{amount_no_decimals}}` in all four formats.

Why: In controlled tests, adding cents made a price feel nearly 9% larger [E2]. All ten competitors show pence, so whole pounds also look more premium. Your prices already end in whole 9s, so nothing is lost.

PDP-06 The per-night line: great idea, too long

P1

Impact Med

Effort S

NOW

"about 6p a night over the 5-year guarantee — How we worked this out" with the maths under it. Wraps to two or three lines on a phone, uses an em dash, and shows on beds without the guarantee (PO-4).

CHANGE TO

One line, memory-foam beds only: **"That's about 6p a night over the 5-year foam guarantee ⓘ"**. The ⓘ opens the maths. It must update with the size chosen (Large: "under 10p a night").

Why: Breaking a price into a small daily amount makes people compare it with small everyday spending, which raises acceptance [E1]. No competitor does it. Keep it short and only where it's true.

PDP-07 The £15 offer isn't where the decision happens

P1

Impact Med

Effort S

NOW

The offer sits in a bar above the breadcrumb. Nothing says whether this bed or size qualifies: Coniston Small (£109) doesn't; Medium (£149) and Large (£179) do.

CHANGE TO

Under the price, by size. Qualifying: **"£15 off this size at checkout, until Sat 31 Oct"**. Small, once spare covers exist: **"Add a spare cover and get £15 off"**; otherwise show nothing. Make the discount automatic: no code to remember.

Why: People speed up as a reward gets closer [E9]. Keep the end date real: the CMA made Emma Sleep stop "limited time" sales that simply carried on afterwards [F6].

SIZE AND DELIVERY

PDP-08 Size cards: add the sleeping area, and check the breed fits

P1

Impact High

Effort M

NOW

"Large · 97 × 76cm · Labrador, Retriever · 25–40kg · £179.00". Your own guide says measure nose to base of tail and add 15 to 20cm, and that the rim takes up part of the outside size. The inside sleeping area isn't given.

CHANGE TO

Add the sleeping area on every bolster, sofa and nest bed: **"Large · 97 × 76cm outside · sleeps about 80 × 60 cm · Labrador, Retriever · 25–40kg · £179"** (measure each bed). On oval and nest beds add **"Best for dogs who sleep curled up"**. A stretched-out Labrador needs around 100cm by your own rule, so Coniston Large suits Labradors who curl, not sprawlers. Say so.

Why: Wrong size is the most common fixable complaint in competitor reviews: about 13 bought the wrong size and 5 found the bed smaller than listed (Section 09). Under your trial each wrong size costs a free collection and a refund. LABONI, Extreme Lounging and FunnyFuzzy give dimensions only; Lords & Labradors gives none (Section 08).

PDP-09 The smallest size is pre-selected

P2

Impact Med

Effort S

NOW

Small loads selected, so the price, button and sticky bar say £109 to a Labrador owner too.

CHANGE TO

Worth testing: no size selected on load, price reads **"From £109"**, button reads **"Choose a size"**. If you keep a default, pre-select the size the Bed Finder recommended when the shopper arrives from it.

Why: Size decides whether the bed works. A deliberate choice cuts wrong-size orders for the cost of one tap. Judgement call; measure add rate before and after.

PDP-10 Make size help personal

P1

Impact Med

Effort S

NOW

"Not sure? Take the 30-second finder" under the size label.

CHANGE TO

"Not sure? Take the 30-second Bed Finder, or send us a photo of them asleep and we'll tell you the size." The second half opens WhatsApp pre-filled: **"Hi, which size Coniston should I get? My dog is a ____, about ____kg."**

Why: George Barclay puts a phone advice line next to its price (Section 08). A quick, honest size answer is a favour that earns the sale, and it's the service owners say competitors fail at.

PDP-11 The delivery line: dates, not working days

P1

Impact High

Effort M

NOW

"Order by 3pm Mon–Fri for same-day dispatch" and "Qualifies for free UK delivery" on two lines, the first inaccurate (PO-3).

CHANGE TO

One line: **"Free delivery · Arrives Tue 14 to Fri 17 Oct"**, or for partner beds **"Free, tracked delivery from our partner warehouse · Arrives Mon 20 to Thu 23 Oct"**. A countdown ("Order in 2h 14m for dispatch today") only on beds that truly leave the same day, counting to the real cut-off.

Why: Shoppers misread "working days" and ranges; a date removes the maths [B12]. Timers must be accurate [F8].

THE BUTTON AND WHAT SURROUNDS IT

PDP-12 Add to basket

P1

Impact Low

Effort S

NOW

"Add to basket · £109.00"

CHANGE TO

"Add to basket · £149": the selected size's price, no pence. Full width, in your CTA colour, with the sticky version kept.

PDP-13 Trust signals scattered under the button

P1

Impact High

Effort S

NOW

A trial sentence, a returns link, "Backed by a 5-year guarantee on the foam", "Secure checkout" and four feature bullets, stacked as separate lines.

CHANGE TO

One three-part row directly under the button. Memory-foam beds: **"100 nights to decide, we collect it free"** · **"5-year foam guarantee"** · **"UK owner support"**. Other beds swap the middle for **"Free UK delivery"**. Each opens its terms in a bottom sheet. Logos underneath, only for payment methods your checkout really takes.

Why: 19% of shoppers have abandoned because they didn't trust a site with their card, 13% over the returns policy and 9% for lack of payment options [A11]. 44% of sites hide the returns policy from the product page while 60% of shoppers look for it there [B8]. You have the best returns offer in the category; make it impossible to miss.

PDP-14 Card only, for a £109 to £259 purchase

P2

Impact Med-High

Effort M

NOW

Revolut takes payment. No pay-in-3, PayPal or express wallet shows on the product page.

CHANGE TO

Apply for a second method that adds pay-in-3 (PayPal with Pay in 3, or Klarna's Shopify app) and show only the provider's own widget under the price, e.g. **"Or 3 payments of £49.67"**. If your Revolut setup supports Apple Pay and Google Pay, switch on the express buttons.

Why: Access to buy-now-pay-later raises total spending and the share spent at retailers [E12]. BNPL lenders have been FCA-regulated since 15 July 2026; merchants who simply offer a provider's product remain exempt, so use the provider's approved widget and wording, never your own [F13]. A second provider also means one company's decision can't stop all your sales.

PDP-15 Feature bullets must be true for the bed they sit on

P1

Impact Med

Effort S

NOW

"High-density memory foam that holds its shape · Cover unzips and machine-washes at 30°C · Waterproof liner keeps accidents out of the foam · Gripped base stays put on wood and tile", the same on Glaramara.

CHANGE TO

Coniston, driven by product data:

- **Low front rim, so stiff legs step in without a climb**
- **Memory foam that takes their shape and comes back by morning**
- **A raised edge to rest a chin on**
- **Waterproof liner, so accidents stop before the foam**
- **Cover unzips and washes at 30°C**

Why: Bullets are the most-read copy on the page. Each must hold for that bed (PO-4).

PDP-16 No "What's inside" card

P1

Impact High

Effort M

NOW

Facts are scattered across the description, the 50kg/m³ block and the comparison table. Foam depth per size, firmness, step-in height and sleeping area aren't stated anywhere.

CHANGE TO

A compact card under the bullets, filled from metafields:
Core: memory foam over support foam · **Foam depth:** S **x** cm, M **x** cm, L **x** cm · **Density:** 50kg/m³ (only with a spec sheet) · **Firmness:** ●●●○○ medium · **Waterproof liner:** yes · **Cover:** zips off, 30°C · **Base:** non-slip · **Step-in height:** **x** cm · **Sleeping area:** per size.

Why: None of the ten competitors publishes density, and only Big Barker (US only) gives layer depths (Section 08). Owners measure thickness in centimetres and dismiss "6–7cm" beds; 14 of 19 forum threads discuss foam quality and firmness (Section 09). Numbers turn "orthopaedic" from a claim into proof.

BELOW THE BUTTON

PDP-17 Great description, best lines buried

P1

Impact Med

Effort M

NOW

"About this bed" runs story → What they get → Best for → Why it is worth the money → Size and fit → Everyday care → vet line → 100 nights → delivery → closing line, all open.

CHANGE TO

Keep the words, change the structure. Show the first two lines of the story with "Read more". Lift "Why it is worth the money" up beside the price as a short **"Worth it?"** block (copy in Section 05). Put Size and fit, Care, Delivery and returns, and Guarantee terms into labelled collapsed sections.

Why: On mobile, Baymard recommends collapsed sections for long pages [B13]. "Is it worth it?" comes up in 18 of 19 owner threads; the answer belongs next to the price.

PDP-18 The same point made four or five times

P1

Impact Med

Effort M

NOW

The trial is explained in the buy box, the description, "What happens after you order", its own section and the FAQ. Sizes appear in the cards, the description table and "Find the right size". The guarantee appears five or more times.

CHANGE TO

Each point once in full, plus one short mention where it helps: trial in the trust row and one full block; sizes in the cards and one size-guide sheet; guarantee in the trust row and the terms section.

Why: Repetition adds screens, not proof. Every extra screen is another chance to leave.

PDP-19 The size table belongs in a sheet, not the page

P2

Impact Med

Effort M

NOW

"Find the right size" and "Measure in 30 seconds" sit in the page flow, well below the size selector.

CHANGE TO

A "Size guide" sheet that opens from the selector, with a simple diagram (nose to base of tail, plus 20cm), your line **"Between two sizes? Size up."** and a new one: **"Sleeps curled up? Measure them curled, and choose a nest or oval bed."**

Why: Help where the choice is made. 57% of sites don't even use buttons for size [B11]; you're ahead, this finishes the job.

PDP-20 Sticky bar and chat bubble compete

P1

Impact Med

Effort S

NOW

A sticky "Add to basket" bar exists. The chat bubble also sits bottom-right.

CHANGE TO

The sticky bar shows the selected size, the price and the button, and appears once the main button scrolls away. The bubble moves off it (PO-5).

PDP-21 Education blocks that must match the bed, plus the DIY rival

P1

Impact Med

Effort M

NOW

"Density isn't firmness" (50kg/m³) and "What the price pays for" (vs "any bed") appear on every product.

CHANGE TO

Show both only on memory-foam beds with a spec sheet. Add one column to the comparison: **"Cot mattress + cover"**, the most common DIY swap in owner forums. Rows: what they lie on · edge to rest a chin · step-in · grip on hard floors · waterproofing · washing · if it's not right · guarantee. Full table in Section 05.

Why: 9 of 19 forum threads suggest a cot mattress instead of a dog bed. Owners already think in layers (core, waterproof barrier, washable top), so show it that way.

PDP-22 No reviews or questions anywhere on the page

P1

Impact Very high

Effort M

NOW

No review section on any product page.

CHANGE TO

This week: a **"Questions owners ask before buying"** block, four to six real questions answered and signed "Abbas, PawLunova". From week two: a review app with photos, verified-buyer badges and a breed and weight filter (Section 11).

Why: Five reviews make a purchase 270% more likely than none, and 380% for higher-priced products [C1, C2]; verified-buyer labels add 15% [C4]. 63% of sites don't let shoppers browse reviewer photos [B6].

PDP-23 Nothing to add to the bed

P2

Impact Med

Effort M

NOW

No add-ons or related products in or near the buy box.

CHANGE TO

"Complete their bed": a spare cover once sourced, and for stiff dogs **"Kirkstone 5-Step Dog Stairs, £189: for the sofa or your bed"**. Then **"Also suits dogs who [sleep style]"** with two or three alternatives.

Why: Covers are the biggest single product complaint about competitors: about 30 reviews mention torn covers, broken zips, shrinking or no spares (Section 09). Testers assume suggested items fit unless told otherwise, so say what fits what [B14].

PDP-24 FAQ misses the questions owners actually ask

P1

Impact Med

Effort S

NOW

Seven questions: size, density, washing, delivery speed, won't use it, guarantee, arthritis.

CHANGE TO

Add five, with answers written out in Section 05: too soft or too firm for an old dog · how thick the foam is in each size · spare covers · chew-proof (an honest no) · who you're talking to when you message.

PDP-25 No human behind the brand

P1

Impact Med

Effort S

NOW

No name or face of the person behind PawLunova on the product page.

CHANGE TO

One line beside the trust row or in the Q&A: **"PawLunova is a small UK business. I'm Abbas, and I answer every message myself."** A small photo if you're comfortable with it.

Why: With no reviews yet, a real person is your most believable trust signal. It also answers the "overseas seller pretending to be British" suspicion behind about 13 competitor reviews (Section 09).

PDP-26 Page speed not yet measured

P2

Impact Med

Effort M

NOW

PageSpeed couldn't be run from here. The page loads a chat widget, a gallery with large source images (some 2,500px) and the theme's scripts.

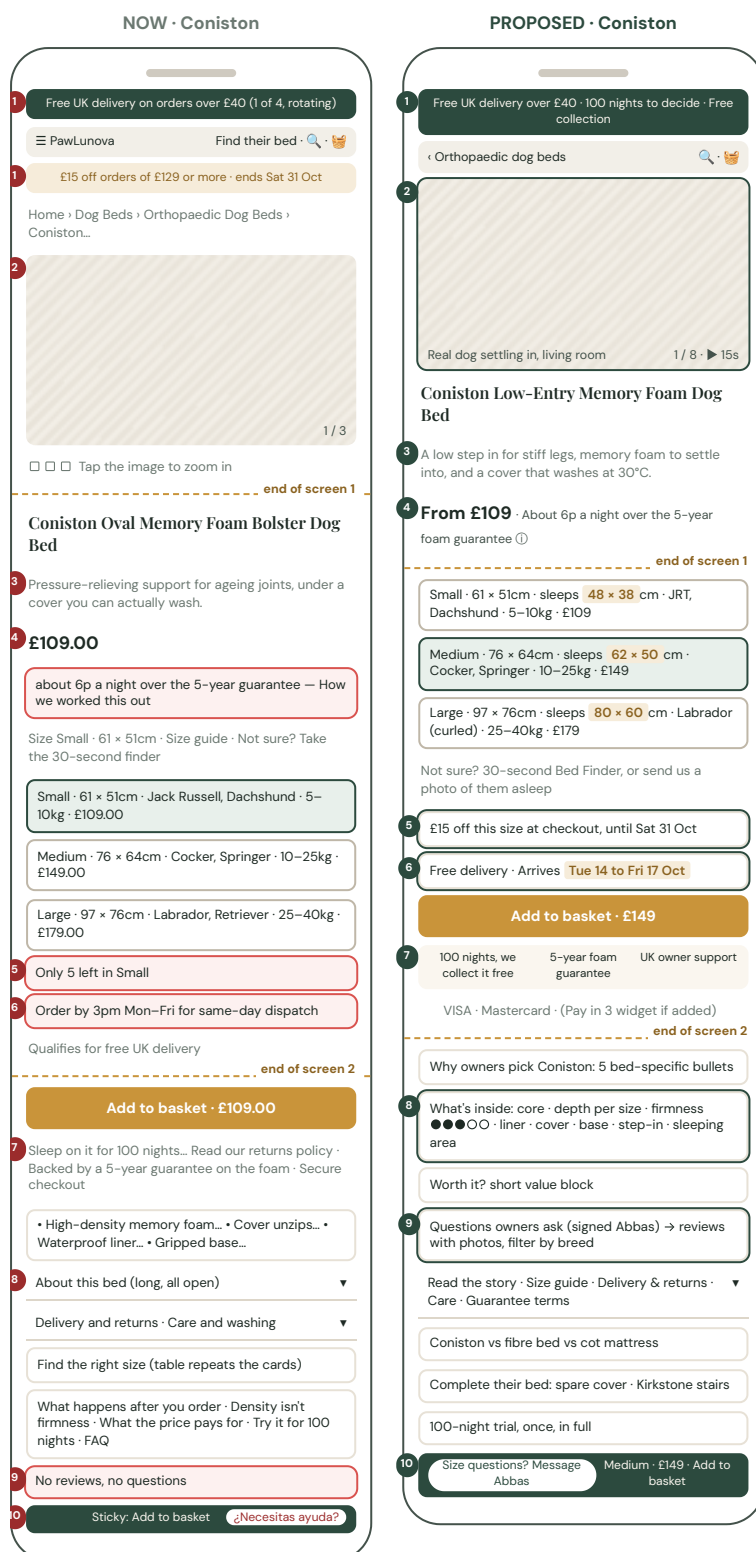

CHANGE TO

Run PageSpeed Insights on Coniston and the collection, mobile. Targets: LCP 2.5s or less, INP 200ms or less, CLS 0.1 or less [D3]. Load the chat widget only when tapped, serve images at display size, remove unused apps.

Why: In the Google and Deloitte study, a 0.1-second faster mobile site lifted retail conversion 8.4% and spend 9.2% [D1].

The new product page

Left: Coniston today, drawn from the live page order (screen breaks estimated for a typical phone). Right: the same page rebuilt. Red markers are problems, green markers the fixes.

Now: what's wrong

1. Three bars and a breadcrumb push the product down; one bar message is wrong.
2. Three images, no video, no in-scale shot.
3. Template subtitle, close to a health claim, shared with Glaramara.
4. Pence on prices; long per-night line with an em dash.
5. "Only 5 left" on every size of every bed.
6. Same-day dispatch claim the shipping policy contradicts.
7. Trust points scattered as separate lines.
8. Long, fully open description; sizes and trial repeated.
9. No social proof at all.
10. Spanish chat bubble on top of the sticky button.

Proposed: what changes

1. One true static bar; back link instead of breadcrumbs.
2. 8 images and a 15-second video; real dog first.
3. Bed-specific subtitle describing what it physically does.
4. "From £109" while no size is chosen; one-line per-night figure.
5. Offer shown for the size picked; automatic at checkout.
6. Delivery dates from the bed's real dispatch time.
7. One trust row; pay-in-3 widget once a provider is added.
8. Spec card: the proof no competitor gives.
9. Questions now, reviews from week two.
10. Clear sticky bar; English chat bubble moved left.

Coniston, rewritten: the copy deck

Every block in page order. Gold highlights are facts only you can fill in (measure the bed or check the supplier sheet). Everything else is ready to paste.

TITLEproduct title

Coniston Low-Entry Memory Foam Dog Bed

SUBTITLEcustom.subtitle

A low step in for stiff legs, memory foam to settle into, and a cover that washes at 30°C.

PRICE LINEmemory-foam beds only

From £109 (no size chosen) · £149 (Medium chosen)

That's about 6p a night over the 5-year foam guarantee ⓘ

ⓘ sheet: £109 ÷ (5 years × 365 nights) = 5.97p a night. It's a way to see the cost over the guaranteed life of the foam, not a payment plan.

OFFER LINEby selected size

Medium or Large: £15 off this size at checkout, until Sat 31 Oct

Small (only once spare covers exist): Add a spare cover and get £15 off

SIZE CARDSvariant metafields

Small · 61 × 51cm · sleeps about 48 × 38 cm · Jack Russell, Dachshund, Pug, Shih Tzu · 5–10kg · £109

Medium · 76 × 64cm · sleeps about 62 × 50 cm · Cocker, Springer, Border Collie, Staffie · 10–25kg · £149

Large · 97 × 76cm · sleeps about 80 × 60 cm · Labrador and Retriever who curl up · 25–40kg · £179

Under the cards: Best for dogs who sleep curled up. Sprawls flat out? See Ambleside.

TRUST ROWeach opens a sheet

100 nights to decide, we collect it free

Your 100 nights start the day it arrives. If it isn't right, tell us any time inside them: we collect it free and refund you in full, including delivery, within 14 days of collection. It can come back slept on, hair and all. One trial per household; chewing damage or heavy soiling can reduce the refund. Full terms.

5-year foam guarantee

If the memory foam core sags, flattens, splits or crumbles so it no longer recovers its shape under normal use within 5 years, we replace the core or the bed and cover the collection. Covers, zips and liners are wearing parts and aren't included. Full terms.

UK owner support

I'm Abbas. PawLunova is a small UK business and I answer every message myself, by email or WhatsApp, usually the same day.

WHY OWNERS PICK CONISTONbullets

- Low front rim, so stiff legs step in without a climb
- Memory foam that takes their shape and comes back by morning
- A raised edge to rest a chin on
- Waterproof liner, so accidents stop before the foam
- Cover unzips and washes at 30°C

WHAT'S INSIDE CONISTONspec card

Core	Memory foam over support foam
Foam depth	S x cm · M x cm · L x cm
Density	50kg/m³, per supplier spec sheet
Feel	●●●○○ Medium
Waterproof liner	Yes, under the cover
Cover	Zips off · 30°C wash
Base	Non-slip
Step-in height	x cm at the front
Sleeping area	See size cards

WORTH IT?beside the price, below the button

A cheaper bed that goes flat by spring means buying another next winter, and a dog on the floor in between.

Coniston's memory foam is guaranteed for 5 years: about 6p a night on the Small, under 10p on the Large. And you've got 100 nights at home to be sure.

QUESTIONS OWNERS ASK BEFORE BUYING until reviews exist

My dog is 12 and stiff in the mornings. Is Coniston too soft?

It's a medium feel: memory foam on top so hips and elbows sink in a little, firm enough underneath that they can push up to stand. The low front means no climbing. If it isn't right, you have 100 nights to send it back.

Will my Labrador fit the Large?

If they sleep curled up, yes: the Large sleeps about 80 x 60 cm inside the rim. If they sprawl flat out, look at Ambleside or Grasmere. Send me a photo of them asleep and I'll tell you honestly.

What if they ignore it?

Some dogs claim a new bed the first night, some take a fortnight. Put it where they already sleep, with a blanket that smells of home on top. If it still isn't theirs inside 100 nights, we collect it free and refund you in full.

How do I wash it?

Unzip the cover and wash it at 30°C. The waterproof liner keeps accidents off the foam, so you never wash the foam itself.

When will it arrive?

You'll see the dates above the button before you order. Tracking comes by email as soon as it leaves.

Abbas, PawLunova

THE STORY first two lines open, then "Read more"

Easy in, easy out, even on frosty mornings. There comes a point where a deep-walled bed stops being cosy and starts being an obstacle, and winter is usually when you notice. [Read more: keep your current story text unchanged.]

CONISTON VS THE ALTERNATIVES replaces "What the price pays for"

	Coniston	Fibre-filled bed	Cot mattress + cover
They lie on	Memory foam core	Polyester fibre that packs down	Foam made for a baby, not a 30kg dog
Chin rest	Yes, low rim	Usually	No
Getting in	Low front, no climb	Varies	Flat
Wood or tile	Non-slip base	Varies	Slides
Accidents	Waterproof liner	Soaks in	Needs a separate cover
Washing	Cover off, 30°C	Often the whole bed	Depends on the cover
Not right?	100 nights, we collect free	Often 14–30 days, you pay postage	You keep it
Foam guarantee	5 years	Rare	None for dog use

COMPLETE THEIR BED add-ons

Spare cover for wash days · £ X (once sourced)

Kirkstone 5–Step Dog Stairs · £189

For the dog who sits by the sofa or your bed and waits to be lifted.

FAQ: FIVE NEW QUESTIONS add to the existing seven

Is it too soft or too firm for an older dog? Each bed's feel is on its spec card, from 1 (soft) to 5 (firm). Older, stiffer dogs usually do best on medium to firm: soft enough to take the pressure off, firm enough to push up from. If you get it wrong, the 100-night trial covers it.

How thick is the foam in each size? It's on every bed's spec card, size by size. "Orthopaedic" on its own tells you nothing; depth and what the foam is made of are what keep a big dog off the floor.

Can I buy a spare cover? Yes, £X / Not yet: message us and we'll tell you when they're in.

Is it chew-proof? No dog bed is, and we won't pretend otherwise. If your dog chews or digs at beds, message us before you order and we'll tell you which bed stands the best chance.

Who will I be talking to? Me, Abbas. PawLunova is a small UK business. Message about size before you buy, or about anything after, and I'll sort it.

Template rules: what shows on which bed

Every block below reads from product data. Set the fields once per bed (Section 13 has the field list) and the page can never claim something a bed doesn't have.

Block	Show it when	Notes
Per-night line, "5-year foam guarantee" in trust row, "year five" comparison row	<code>foam_guarantee</code> = true	True only for the 23 beds described as memory foam (appendix table). Matches your refund policy wording.
Density figure and "Density isn't firmness" block	<code>density_kg_m3</code> has a value	Fill only from a supplier spec sheet you keep on file.
"Waterproof liner" bullet and spec row	<code>has_liner</code> = true	Glaramara, Mungrisdale, Langdale and Patterdale don't mention a liner. Honister has a coated cover, not a liner.
"Washes at 30°C" bullet	<code>wash_temp</code> has a value	Coated-fabric beds get the wipe-clean care line instead (<code>cover_type</code> = coated).
Low-entry bullet and filter	<code>low_entry</code> = true	Coniston, Newlands, Easedale, Burnmoor (lowered front), Braithwaite (open corner). Add step-in height in cm.
Sleeping area, breeds, weight on size cards	variant fields filled	<code>sleep_area</code> , <code>suits_breeds</code> , <code>suits_weight</code> . Breed names never go in the variant title.
Delivery line	always	Text from <code>ships_from</code> (own stock / partner); dates from <code>dispatch_days_min/max</code> plus 4 to 6 working days.
Countdown to cut-off	own stock and same-day dispatch true and before 3pm on a working day	Hide in every other case.
Subtitle, "Best for" tag	always	<code>subtitle</code> , <code>best_for</code> . One per bed, never shared.
Stars and review count	5 or more genuine reviews in the review app	Otherwise show the new-brand line.

Subtitles and lead bullets by bed type

Bed type	Beds	Subtitle	Lead bullet
Low-entry memory foam	Coniston	A low step in for stiff legs, memory foam to settle into, and a cover that washes at 30°C.	Low front rim, so stiff legs step in without a climb
Memory foam bolster or sofa	Grasmere, Staveley, Melbreak, Martindale, Rosthwaite, Longsleddale, Mardale, Windsor, Haweswater	Soft sides to lean on, memory foam underneath, and an open front to step in.	Bolsters for leaning and chin-resting
Memory foam mattress	Ambleside, Buttermere, Wastwater	Memory foam to every edge, so a big sprawler gets the whole bed, not just the middle.	No walls: every centimetre is sleeping space
Deep gel memory foam	Ennerdale	24cm of gel memory foam between a big dog and a cold winter floor.	24cm deep, in Large and XL
Memory foam nest	Skelwith, Borrowdale, Elterwater	Soft walls on every side for the dog who curls up tight, with memory foam underneath.	Bolstered all round for burrowers
Egg-crate bolster or sofa	Nocturne, Scafell, Burnmoor, Easedale, Newlands, Braithwaite, Bowfell, Esthwaite	Profiled foam that spreads their weight off a hard floor, with soft sides to lean on.	Profiled egg-crate foam, not loose fibre
Egg-crate mattress	Glaramara, Loughrigg, Mungrisdale, Honister, Patterdale	An open mattress of profiled foam, so they can flop down whichever way they land.	Profiled egg-crate foam, not loose fibre
Fibre-filled nest (not orthopaedic)	Windermere Nest, Blea Tarn, Harewood	A soft, high-sided nest for curlers who like to tuck in. Fibre-filled for softness; for firm support, see our memory foam beds.	High sides to press their back into

Collection page audit

/collections/orthopaedic-dog-beds: 37 beds, 71 mobile sessions, 1 add to basket. Your weakest page and your biggest opportunity. PO items (rating, stock lines, guarantee maths, size labels) are in Section 03.

COL-01 The first bed appears too late

P1

Impact High

Effort S

NOW

Bars, header, promo bar, breadcrumb, H1, intro, a bare "4.8", a three-point trust row, "Shop by how they sleep, or what they need" with seven chips, "Beds in this collection", the filter button and "37 beds" all come before the first product. From the page order, the first image starts at the bottom of screen one or on screen two.

CHANGE TO

One bar. H1 and two lines of intro. Then straight into **"Start with how they sleep"** (COL-03), then filter chips and a sticky **"Filter & sort"** button above the grid. Drop the repeated trust row (it's in the bar) and the "4.8".

Why: On a list page the beds are the content. Baymard rates 78% of mobile product lists "poor to mediocre" [B16].

COL-02 The sleep-style chips send shoppers to site search

P1

Impact Med

Effort S

NOW

"Stiff in the mornings", "Curls up tight", "Leans on the edge", "Sprawls out flat", "Big dogs, 25kg+" and "Runs hot" link to /search?q= orthopaedic, nest, bolster, flat, large, cooling. "Big dogs, 25kg+" searches the word "large", which matches any bed with a Large size.

CHANGE TO

Each chip filters this page (Search & Discovery filter links), or goes to the matching collection: Curls up tight → Nest & donut · Leans on the edge → Bolster · Sprawls out flat → Mattresses & flat · Big dogs, 25kg+ → filter dog's weight 25kg+ · Runs hot → Elevated & cooling · Stiff in the mornings → filter **Low step-in**.

Why: A filter should narrow the list you're on. Search results have no merchandising, no filters, and can mix in guide pages.

COL-03 No curated place to start

P1

Impact High

Effort M

NOW

37 beds in one grid. No recommendation, no "start here".

CHANGE TO

"Start with how they sleep": four compact cards in a swipeable row. **Stiff mornings** → Coniston, from £109 · **Leans on the edge** → Grasmere, from £149 · **Stretches flat out** → Ambleside, from £139 · **Curls up tight** → Borrowdale, £149. Each card: photo, one line, price, and "See beds like this", which applies the filter. The same pattern as your homepage's "Four good places to start".

Why: Your own data: the curated homepage adds at 7.7%, this list at 1.4%. In the classic jam study, 3% bought from a table of 24 options against about 30% from 6 [E5]. Grasmere and Ambleside are your two best sellers.

COL-04 Filters that tell a shopper nothing

P1

Impact High

Effort M

NOW

Availability (In stock 37, Out of stock 0) and Price (up to £259). Nothing about the dog or the bed.

CHANGE TO

Search & Discovery filters from metafields: **Dog's weight** (Up to 10kg · 10–25kg · 25–40kg · 40kg+) · **How they sleep** (Curls up · Head on the edge · Stretches out) · **What's inside** (Memory foam · Egg-crate foam) · **Features** (Waterproof liner · Low step-in · Non-slip base · Machine-washable cover · Cooling gel) · **Shape** (Bolster & sofa · Mattress · Nest · Corner & chaise) · Price · Colour. Remove Availability. Show counts, allow several picks, show active filters as removable chips.

Why: 57% of sites lack essential filters [B17]. Baymard's mobile guidance: a sticky filter button opening a drawer, result counts, multi-select and category-specific filters [B18]. Only Ralph & Co and FunnyFuzzy offer a breed-size filter (Section 08), so "dog's weight" is a gap you can own.

COL-05 The wrong beds go first

P1

Impact Med–High

Effort S

NOW

The manual order opens with Scafell £199, Lingholm £179, Mardale £239, Staveley £199, Wastwater £219 and Watendlath £199. Your best sellers sit at positions 8 (Grasmere) and 10 (Ambleside); the lowest-priced bed (Chatsworth, £69) at 22. Nine sort options, including "Date, old to new".

CHANGE TO

Manual order: **1 Grasmere · 2 Ambleside · 3 Coniston · 4 Langdale · 5 Nocturne**, then the remaining memory-foam beds from highest to lowest price, then the egg-crate beds. Sort menu: Recommended, Best selling, Price low to high, Price high to low, Newest.

Why: Lead with what's proven to sell. After that, listing high to low nudges choice toward higher-priced options where price signals quality [E6]. 69% of mobile sites lack the essential sort types [B16].

COL-06 Cards carry the wrong information

P1

Impact High

Effort M

NOW

Title, price with pence, *"about 11p a night over the 5-year guarantee — How we worked this out"* with its maths, *"Only 4 left"*, and a button. No "Best for", no size on single-size beds, nothing about what's inside.

CHANGE TO

[Best for: Stiff mornings]
Coniston Low-Entry Memory Foam Dog Bed

From £109 · S–L · 61–97cm

Memory foam · Liner · 30°C

(stars once 5+ genuine reviews)

Remove the per-night line, its maths and the stock line from every card.

Why: Cards exist to help a shopper choose between beds. "Best for" already works on your homepage; spec chips answer "is it real foam?" at a glance. Baymard: 80% of sites don't show 3+ thumbnails and 42% don't combine variants into one list item [B16].

COL-07 Memory foam and egg-crate beds look identical

P1

Impact High

Effort S

NOW

23 memory-foam and 14 egg-crate beds sit together under "Orthopaedic Dog Beds" with the same card treatment and the same guarantee line.

CHANGE TO

A "What's inside" chip on every card (**Memory foam** or **Egg-crate foam**) plus the filter. In the intro: **"Two kinds of foam: memory foam that moulds to them, and profiled egg-crate foam that spreads their weight. Every bed says which."**

Why: Real memory foam is your differentiator: no competitor publishes density, and FunnyFuzzy sells a fibre-filled bed as "Fully Orthopaedic". Blurring the two gives that away and creates the claims risk in PO-4.

COL-08 Images that don't match each other

P2

Impact Med

Effort L

NOW

First images mix supplier photos, white-background PNGs and lifestyle shots. Newer beds (Lingholm, Mungrisdale, Loughrigg) have no alt text. Each card also loads a second "hover" image a phone can't hover.

CHANGE TO

One house style for the first image: three-quarter view, a real dog on the bed, warm room, same crop. Second image, on swipe: in-scale or cut-away. Turn the hover image off on mobile or lazy-load it. Alt text on every image.

Why: A consistent grid scans faster and looks premium. In Baynard's furniture study, 65% of participants relied on thumbnails in product lists [B5].

COL-09 Numbered pages

P3

Impact Low

Effort S

NOW

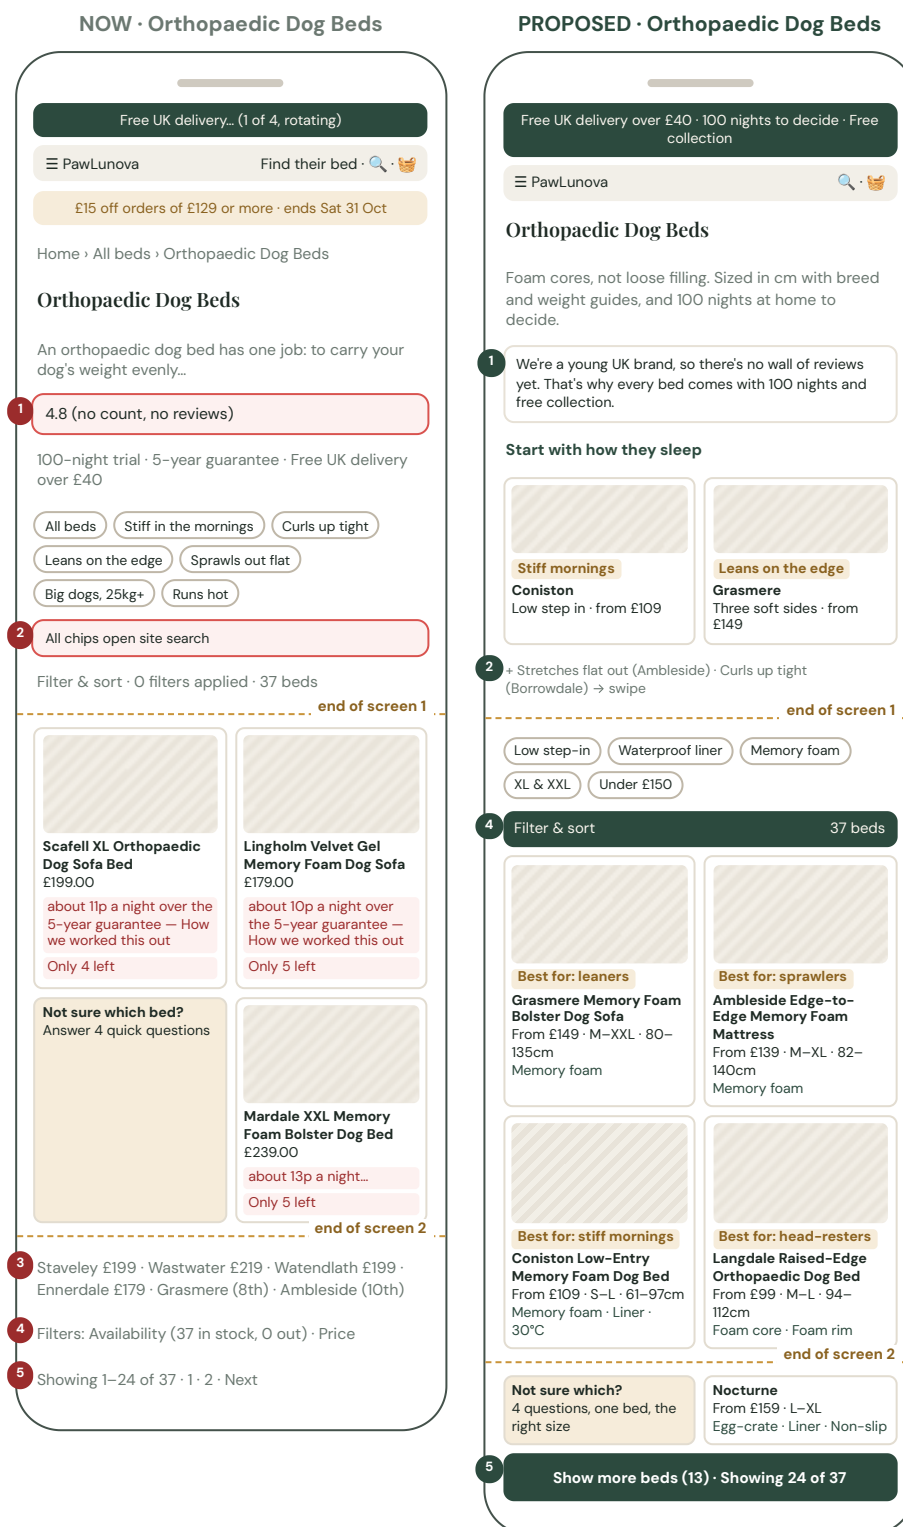

"About Orthopaedic Dog Beds", three checks including the fist test, who it's for, and FAQs. Good, compliant copy.

CHANGE TO

Keep it. Link "the fist test" to the 15-second foam video once it's filmed, and point "a good place to start" at a memory-foam best seller rather than Nocturne (egg-crate).

The new collection page

Left: the orthopaedic collection today, from the live page order. Right: rebuilt around the pattern your homepage already proves: a short, curated start, then a clean, filterable grid.

1. A rating with no reviews behind it.
2. Good chip labels, wrong destination: site search.
3. Opens with £179–£239 beds; best sellers 8th and 10th; long price maths and stock line on every card.
4. Filters about stock and price only.
5. Numbered pages.

1. Honest new-brand line in place of the rating.
2. Four curated starting beds by sleep style, as on the homepage.
3. Best sellers first; clean cards with "Best for", sizes in cm and spec chips.
4. Sticky filter bar with dog-led filters.
5. "Show more" button with a count.

Collection copy deck

HEADER

H1 + intro

Orthopaedic Dog Beds

An orthopaedic dog bed has one job: to carry your dog’s weight evenly so their hips, elbows and shoulders never press through to a hard floor.

Foam cores, not loose filling. Every bed sized in cm with breed and weight guides, and 100 nights at home to decide.

Two kinds of foam: memory foam that moulds to them, and profiled egg-crate foam that spreads their weight. Every bed says which.

NEW-BRAND LINE

until reviews exist

We're a young UK brand, so there's no wall of reviews yet. That's why every bed comes with 100 nights at home, and free collection if it isn't right.

START WITH HOW THEY SLEEP

four cards

Tag	Bed	Line	Link
Stiff mornings	Coniston, from £109	A low step in and memory foam to settle into	See low step-in beds
Leans on the edge	Grasmere, from £149	Three soft sides to lean on	See bolster beds
Stretches flat out	Ambleside, from £139	Foam to every edge, up to 140cm	See mattresses
Curls up tight	Borrowdale, £149	Soft walls on all four sides	See nest beds

QUICK FILTER CHIPS

What competitors do

Flagship orthopaedic PDP and main dog-bed collection for ten brands, read on 10 Oct 2026: George Barclay (GB), VetRelieve (VR), Big Barker (BB, US only), LABONI (LAB, no UK store), Ralph & Co (R&C), Omlet (OML), FunnyFuzzy (FF), Extreme Lounging (EL), Lords & Labradors (L&L), Charley Chau (CC). Their own marketing claims are recorded, not treated as fact.

n/d = not detected in page text (may load by script). n/s = not stated. n/c = not captured. Returns "you pay" = customer pays return postage. Prices as listed on 10 Oct 2026; Omlet's £259 is mattress + topper + feet.

Copy these

1. **George Barclay's advice line next to the price**, plus a two-step bed selector (breed band with a kg cap, then style). Yours: Bed Finder plus "send us a photo".
2. **Omlet's free returns and 180-day guarantee in the header**, real dogs throughout the gallery, 9 collection filters and a "Load more" counter.
3. **Charley Chau's labelled foam cut-away photo** and a stated foam grade and depth, plus a clear 1pm same-day cut-off.
4. **Big Barker's layer-by-layer foam depths** and buy-box add-ons (cooling layer). Its authority comes from named vets and a study; yours can come from specs.
5. **Ralph & Co's breed-labelled sizes and breed-size filter** (not its permanent was=prices).
6. **FunnyFuzzy's Features filter** (Orthopaedic, Cooling, Waterproof) and wallet icons beside the button.
7. **Extreme Lounging's stated delivery cut-offs** and card-style size selector.
8. **Lords & Labradors' personalisation add-on** (+£20) as a future margin idea.

Exploit these gaps

1. **Nobody publishes foam density**. Only Big Barker (US only) gives layer depths.
2. **No collection card shows stars**, at any of the ten. The first UK brand with genuine stars on cards stands out.
3. **Returns are weak**: at least five make you pay postage and four allow 14 days. Only Omlet matches your offer.
4. **No one shows a delivery date**. Two state a cut-off.
5. **Size help is thin or contradictory** (R&C's selector and guide list different breeds; BB's guide and FAQ measure differently).
6. **Health claims are un evidenced** (LAB's dysplasia claims, "clinically tested" on a VR stockist). Your careful wording is an advantage.
7. **No pay-in-3 line in any buy box**.
8. **No "Best seller" badges, no review filters by breed, no foam-recovery video** anywhere.

Don't copy these: they're where the fines are

- **Permanent was=prices** (Ralph & Co shows one on every size). The High Court found Emma Sleep infringed where a struck-through price was never actually charged or wasn't the price immediately before [F7].
- **A "20% off" badge where the old price equals the new one, countdown timers and an unnamed free gift** (FunnyFuzzy). Timers must be accurate [F8]; a "free gift" must be real and described [F10].
- **"Limited availability due to high demand"** (Omlet) unless sales data shows it. Emma Sleep admitted false "high demand" messages [F6].
- **"Clinically proven" and condition claims** (Big Barker's line, LABONI's arthrosis and dysplasia claims). In the UK, treatment claims are for licensed medicines and health benefits need robust evidence [F11].

What their customers say

About 300 reviews of rival orthopaedic and memory foam beds on Trustpilot (13 brands), Feefo and zooplus, around 200 of them detailed enough to count as high-value (breed, age, condition, months of use, price, comparisons, repeat buyers). Plus 19 owner forum threads, mostly Mumsnet and MoneySavingExpert. Reddit and Amazon block automated reading, so neither is included.

The insight that changes the copy: owners are protective, not guilty

Across roughly 200 detailed reviews, guilt barely appears. Owners write about a named dog, often an old one, with pride and relief: it settles, it sleeps through, it won't get off the bed, the cat's moved in too. They talk about comfort mattering "for her", not about feeling bad. So lean on **protective pride and visible results** ("they've earned a proper bed", "straight in from the first night") rather than guilt. It converts the same instinct without making the reader feel judged.

What happy owners praise, and how they say it

Theme	Reviews	How they put it (paraphrased, their register)	Use it on
The "after": settles, sleeps through, straight in, won't get off it, sides as a pillow, the other dog or cat takes it	~45	"sleeps right through now" · "straight in for a snooze the minute it was out of the box" · "can barely get him off it" · "uses the side as a pillow" · "the cat's moved in too"	PDP story opener, collection "Best for" tags, review prompts
Value: not cheap but worth it, years of use, cheaper beds didn't last, second or third bed bought	~45	"not cheap, but it's paid for itself" · "the cheap ones never lasted" · "still like new after years" · "don't let the price put you off"	"Worth it?" block, per-night line
The "before": old beds went flat, dog on the sofa, stiff or restless	~25	"the cheap ones go flat in no time" · "he'd pace about and couldn't get comfy" · "she was stiff every time she got up"	Collection intro, PDP subtitles
Bed qualities: washable cover, holds its shape, firm but comfy, looks good in the house	~19 / 10 / 10 / 9	"cover zips off and washes" · "hasn't gone flat" · "nice and firm but still comfy" · "looks lovely in the lounge"	Bullets, spec card
Owner emotion: the dog named, age mentioned, a medical reason	most / ~15 / ~30	"my lovely old girl deserves a proper bed" · "she's got arthritis, comfort really matters" · "he's just had his op and needs somewhere soft"	Headlines, older-dog collection

In their words (internal reference only, not for publishing)

- "He settles much easier and sleeps through the night." Trustpilot, Ralph & Co, ageing cocker
- "they are not cheap but worth it, in the long run" Trustpilot, Tuffies
- "Having the sides seems to help him relax" Feefo, George Barclay
- "the sides have not collapsed down at all" Trustpilot, Omlet, 38kg greyhound

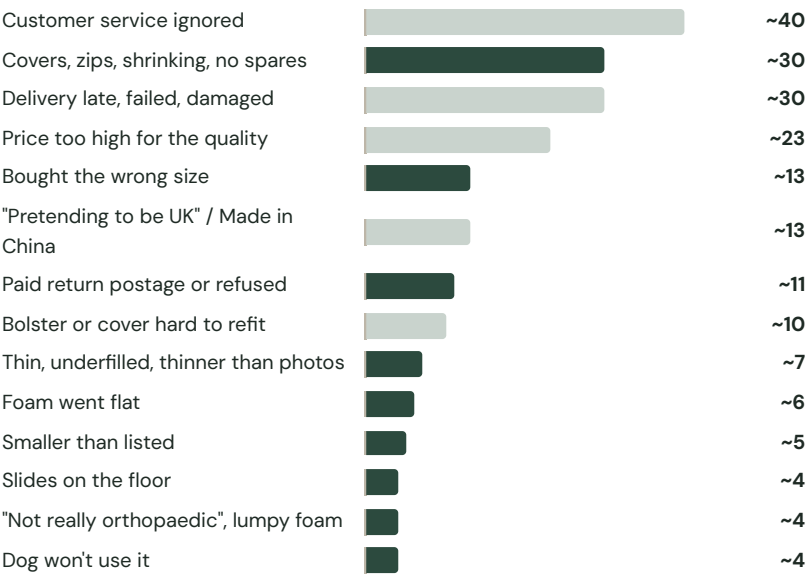

British words owners actually use

Use: lovely, comfy, cosy, settle, snooze, sleeps right through, straight in, stretch right out, won't get off it, a proper bed, our girl, my boy, stiff in the mornings, gone flat, cold tiles, the sofa or settee, worth every penny.

Avoid: pain relief, treats arthritis, therapeutic, clinically proven, vet approved (unless evidenced), fur baby, pet parent, couch, "luxury" on every line, "orthopaedic" without saying what's inside, guilt lines that blame the owner.

What goes wrong, and where you already win

Complaints in 1–3 star and mixed reviews (approximate review counts)

Dark bars: product and page problems a product page can answer. Light bars: service and operations. FunnyFuzzy accounts for much of the delivery and service count.

In their words (internal reference only)

- "My dog is pretty much laying on the floor" Trustpilot, George Barclay
- "it's so lumpy, I don't know how it can be called orthopaedic" Trustpilot, Pets Love Scruffs
- "Sadly the zip broke in mine after the first wash" zooplus own-brand bed

The pattern: above about £130, an early failure turns into a "waste of £X" review. Happy owners at the same prices quote years of use as their proof. Your guarantee and trial speak directly to that fear; your page needs to show the proof (depths, photos, reviews) that makes them believable.

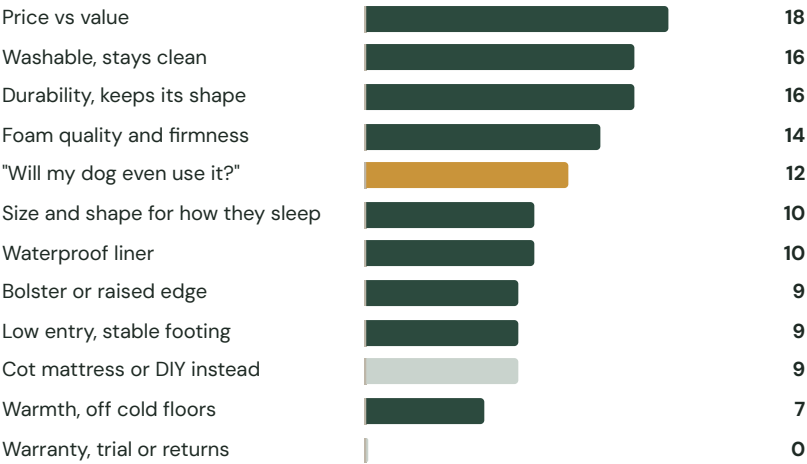

Ratings tell a story too: George Barclay scores 3.2 on Trustpilot (43 reviews) but 4.9 on Feefo (3,800+). Reviews a brand asks for and reviews people volunteer can look very different, which is why shoppers go looking for the bad ones.

Gap map: their complaint, your answer

Complaint	You fill it?	Line to use (only where true for that bed)
Wrong size, smaller than listed	Yes	"Each size shows the breeds, the weight and the sleeping area inside the rim. Get it wrong and the 100-night trial covers it."
Paid return postage, return refused	Yes	"Changed your mind? We collect it free from the UK mainland, even slept on."
Dog won't use it	Yes	"Some dogs take a few nights to come round. You've got 100."
Foam went flat	Yes (memory foam beds)	"Memory foam core guaranteed for 5 years against flattening. Covers, zips and liners aren't included."
Too high to step into	Yes (low-entry beds)	"Low front, so stiff legs step in without a climb."
Slides on the floor	Yes (where fitted)	"Non-slip base stays put on wood and tile."
Thin or underfilled	Partly	State foam depth per size on the spec card, and show the cut-away photo.
"Not really orthopaedic", lumpy foam	Partly	"No mystery stuffing: it says exactly what's inside." Say "crumb memory foam" on Chatsworth rather than hiding it.
Covers tear, zips break, no spares	Partly	"Cover unzips and washes at 30°C." Add spare covers; never imply the cover is guaranteed.
Bolster or cover hard to refit	Partly	Show the cover coming off and going back on in the 15-second video. Say "easy" only once you've timed it.
Customer service ignored	Partly	"A real person in the UK. Message Abbas." Only promise a reply time you keep.
Delivery late or vague	Partly	An accurate, dated delivery line (PO-3). This is where you are most exposed.
"Pretending to be UK"	Partly	"PawLunova is a small UK business." Never imply UK-made unless it is.
Price too high for quality	Partly	"Not the cheapest bed. That's why the memory foam core is guaranteed for 5 years, and you get 100 nights to decide."
Chewed through	No	"Not chew-proof. If your dog destroys beds, message us before you order."

What owners weigh up before they buy

Decision criteria raised in 19 UK owner forum threads

Threads raising each point, out of 19 (Mumsnet, MoneySavingExpert, one US forum). The gold bar is the top worry before buying.

Two findings worth acting on

Nobody expects a trial. Not one thread mentioned a trial, warranty or returns; proof is always "years of use". Your 100 nights is a genuine surprise, so explain it next to the price, not at the bottom.

The real rival is DIY. In 9 threads owners suggest a cot mattress (£50 to £75 before a cover), folded duvets or foam offcuts instead of a dog bed. Your £69 to £109 beds compete with that, so name its weak points kindly in the comparison table.

From the forums (internal reference only)

- "Lesson learned: easy entry/low beds for ache-y dogs." Chronicle of the Horse forum
- "Sometimes too soft can be more painful for stiff joints than too hard." Mumsnet

Objections, and the answer to put on the page

What they're thinking	Answer on the page	Where
"Is £150 really worth it for a dog bed?"	Per-night figure, the 5-year foam guarantee, and "a cheaper bed that goes flat by spring means buying another next winter".	Price line, Worth it?
"Will my dog even use it?"	"Some dogs claim it the first night, some take a fortnight. Put it where they already sleep, with a blanket that smells of home. You've got 100 nights."	Trust row, Q&A, tile
"Will it flatten like the last one?"	Foam depth per size, density where documented, a foam-recovery clip, and the guarantee.	Spec card, video
"Too soft or too firm for an old dog?"	Feel scale 1 to 5 on every bed; "medium to firm suits most older dogs"; the trial if you get it wrong.	Spec card, FAQ
"Which size?"	Sleeping area, breeds and weight on each size; "measure them curled or stretched"; send a photo.	Size cards
"Can I keep it clean?"	Waterproof liner where fitted, 30°C cover, spare covers.	Bullets, add-ons
"Is 'orthopaedic' just cheap foam?"	Memory foam or egg-crate stated on every card and page, with what's inside.	Cards, spec card
"Couldn't I use a cot mattress?"	The three-way comparison: chin rest, step-in, grip, liner, washing, trial, guarantee.	Comparison table

Fifteen lines in the owners' voice

Original wording built from the review and forum language above, not copied from any review. Use them as brand copy. Never put them in quote marks, next to names or beside stars, because you have no reviews yet and presenting brand copy as a review is illegal [F2].

#	Line	Theme	Use on
1	For the old girl, or old boy, who's earned a proper bed.	Protective pride	Older dogs collection, homepage
2	Room to stretch out, have a big sigh and settle.	The "after"	Mattress PDPs
3	Give them a better spot than the sofa.	The "before"	Sofa beds
4	Sides made for resting a sleepy head.	Bolster as pillow	Bolster bullets
5	Built not to go flat by spring, and the memory foam core is guaranteed for 5 years.	Value, flattening	Memory foam PDPs
6	No mystery stuffing. It says exactly what's inside.	Real foam	Spec card heading
7	Easy in, easy out for stiff morning legs.	Mobility	Low-entry beds
8	Big lads need room too: sizes up to 137 × 97cm.	Size	XL & XXL collection
9	Zip the cover off, wash it at 30°C, pop it back on.	Washable	Where true
10	Stays put when they flop down.	Non-slip	Where fitted
11	Accidents happen. The waterproof liner keeps them off the foam.	Waterproof	Liner beds only
12	Pick by breed and weight, not guesswork.	Sizing	Size cards
13	Not sure they'll take to it? You've got 100 nights to find out.	Will they use it	Trust row, tiles
14	Changed your mind? We collect it, with no return postage to pay.	Returns	Trial sheet (UK mainland)
15	A real person in the UK to message if anything's not right.	Service	Trust row, chat

Psychology playbook

You asked for the persuasion competitors use, turned up. Here are sixteen levers with the research behind them, who uses them now, and a stronger version for PawLunova. Every version is true, because the fake ones (reset timers, invented stock, review counts, permanent "was" prices) are exactly what the CMA has made Emma Sleep and Wowcher drop, they're on your own banned list, and a wave of complaints is the one thing you can't afford with a single payment provider.

#	Lever	The science	Who uses it now	Your stronger, true version	Where
1	Risk reversal and ownership	Lenient returns raise purchases more than returns; longer windows reduced returns [E8]. People value what they already have more [E11].	Omlet (180 days, free). Most others: 14–30 days, you pay.	"100 nights at home. Slept on, hair and all. We collect it free." Plus the ownership cue: "Put it where they already sleep, with a blanket that smells of home."	Trust row, Q&A, collection tile
2	Pennies a day	Small daily amounts get compared with small daily spends, raising acceptance [E1].	Nobody.	"That's about 6p a night over the 5-year foam guarantee" , one line, maths behind ①, memory foam beds only.	Price line
3	Prices that look smaller	Adding cents made prices feel nearly 9% larger [E2].	All ten show pence.	"£149" , never "£149.00", on cards, buy box, button and sticky bar.	Everywhere
4	Left digit	A 9-ending feels cheaper only when the leftmost digit changes, e.g. £199 vs £200 [E3].	Common.	Keep £99 and £199 (they cross a boundary). Elsewhere your 9-endings are brand style; don't trim prices for it.	Price ladder
5	The word "free"	A zero price adds perceived benefit, not just a lower cost [E4].	R&C, EL, FF on delivery.	Say "free collection" and "free delivery" in those words. It must really be free (CAP 3.23) [F10].	Bar, trust row
6	Goal gradient	People speed up as a reward gets closer [E9].	L&L (free delivery over £75), CC (over £150).	"£15 off this size at checkout" ; on Small, "add a spare cover and get £15 off" ; in the basket, "£20 away from £15 off".	Buy box, basket
7	Fewer choices	3% bought from 24 jams vs about 30% from 6 [E5].	GB shows 323 beds; most show everything.	Four "Start with how they sleep" cards, the Bed Finder, and dog-led filters.	Collection top
8	Good, better, best	Adding an option a buyer can rank against shifts share to the better one [E7].	Nobody structures a ladder.	For one need, show three real beds together: Langdale (foam rim, from £99) · Coniston (memory foam, low entry, from £109) · Ennerdale (24cm gel memory foam, from £179). The middle one reads as the sensible pick.	"Also suits" row, collection
9	Price order	High-to-low listings lead to higher-priced choices where price signals quality [E6].	Nobody deliberately.	Best sellers first, then high to low.	Collection sort
10	People like me	"Other guests here did this" beat a generic appeal: 44.1% vs 35.1% [E10].	R&C and L&L widgets, Omlet's verified count.	Now: "On UK owner forums, the same three things come up: solid foam, a cover that washes, an easy step in. Here's this bed on each." Later, from your own orders: "Most owners of 25kg+ dogs choose XL", and reviews you can filter by breed and weight.	PDP, collection
11	Specifics as authority	Owners measure thickness in cm and distrust "orthopaedic" (Section 09).	BB uses vets and a study; others use adjectives.	Numbers instead of adjectives: depth per size, density with a spec sheet, 30°C, step-in height in cm, 100 nights.	Spec card

#	Lever	The science	Who uses it now	Your stronger, true version	Where
12	Protective pride	Detailed reviewers express pride and relief, almost never guilt (Section O9).	Most sell "luxury" and looks.	"They've earned a proper bed." Show visible results ("straight in", "sleeps right through") and the moment owners recognise: the pause at the bottom of the stairs.	Headlines, subtitles
13	The cost of waiting, told truthfully	A flat bed's real cost is the dog on the floor (your own homepage line).	FF uses timers instead.	"A bed that's gone flat means they're lying on the floor with a cover over it." No health scares, no "suffering" language.	Collection intro, story
14	Real deadlines only	Timers and stock claims must match reality [F8]; no fake "limited time" [F6].	FF timers, BB sale timer, Omlet "high demand".	Today's dispatch cut-off where true; Christmas last-order dates from November; a promo end date you then honour.	Delivery line, bar
15	A favour first	Help before the sale earns it (owner forums value service highly).	GB's advice line.	"Send us a photo of them asleep and we'll tell you the size." Answers signed by Abbas.	Size help, chat
16	Small commitments	A recommendation people helped create feels like their own choice.	GB's bed selector.	Bed Finder result opens the PDP with "Your match: Coniston Medium" already selected; optional "Email me my match".	Finder → PDP

Your "Guilt Engine", re-tuned

Keep the love, lose the blame. Lines like your homepage closer ("They've given you every good year they had. The least we can do is make the next ones easier to get up from.") work because they're gratitude, not accusation. Avoid anything that implies the owner has let the dog down ("Is your dog suffering?"). Reviewers buy out of pride in their old dog; meet them there.

Never, on any page

Review counts or stars you can't evidence · stock numbers that aren't real · timers that reset · "was" prices you never charged · "high demand" without sales data · "clinically proven", "relieves arthritis", "vet recommended" without a named vet and evidence · "Made in Britain" unless it is · unnamed free gifts · brand copy dressed up as a review.

The reviews engine

The single biggest lever on both pages, and the one you can't shortcut. The goal: genuine reviews on your six key beds within six weeks, 50 across the catalogue by about week ten.

270%

More likely to buy with 5 reviews than none [C1]

380%

The same effect for higher-priced products [C2]

4.0–4.7

Where purchase likelihood peaks. A perfect 5.0 is distrusted [C3, C5]

50

Reviews across your catalogue before Google Shopping stars appear [F16]

SET-UP (WEEK 1)

- 1 Install a review app** with verified-buyer badges, photo and video reviews, Q&A and a Google Shopping feed (Judge.me, Okendo or Loox; check current pricing).
- 2 Publish a short review policy** linked from the reviews section: how reviews are collected, that every review is published whatever the rating, how fakes are spotted, and how any thank-you is disclosed. The CMA expects this [F4].
- 3 Collect the dog's details** in the review form: breed, age, weight, and how they sleep. This powers a "reviews from dogs like mine" filter nobody else has.
- 4 Turn on photo prompts:** "A photo of them on it helps other owners choose the right size."

GETTING REVIEWS (WEEKS 1–8)

- 1 Ask at day 14 after delivery**, not at dispatch: they need nights on the bed. Reminder at day 21. A second ask at day 60: "Still holding up?" Long-term reviews are what owners trust most.
- 2 Ask every genuine past customer**, including old-store orders of the same beds. Import only reviews you can tie to a real order.
- 3 Seed 10 to 15 beds** with real owners of older or larger dogs (local walkers, rescue fosters, breed clubs) for an honest review, published with "Received free for review".
- 4 Thank everyone the same way, whatever the rating**, and label it: a £5 donation to a named dog rescue per review, or a code for a spare cover. Thanks tied to good ratings are banned [F4, F17].
- 5 Reply to every review within 48 hours**, negative ones first. 89% of sites don't [B7]; 96% of shoppers look for the bad ones [C5].

WHERE REVIEWS SHOW

Place	Rule
PDP, under the title	Stars + count once that bed has 5 genuine reviews
PDP, review section	Photo gallery first, then filters: breed size, age, how they sleep
Collection cards	Stars + count at 5+ reviews; nothing below that
Homepage	Only the app's live total, never a typed number
Google Shopping	App feed to Merchant Center after 50 reviews

DAY-14 REQUEST EMAIL

ready to use

Subject: How's {{dog_name | default: "your dog"}} getting on with Coniston?

Hi {{first_name}}, Coniston arrived two weeks ago. Honest question: is it getting used?

A few lines from you, good or bad, help another owner pick the right bed and size. A photo of them on it helps even more.

[Write a review]

As a thank-you for any review, whatever you say, we'll donate £5 to **named rescue**.

If something isn't right, just reply to this email instead and I'll sort it. You've still got {{nights_left}} nights of your trial.

Abbas, PawLunova

DAY-60 FOLLOW-UP

long-term proof

Subject: Two months on: is Coniston holding up?

Quick one: two months in, how's the foam holding up, and are they still using it? Add an update to your review, or reply here if anything's wrong.

Don't: write reviews yourself, ask friends who haven't bought, hide negative reviews, reward only good ratings, or import counts you can't trace to orders.

Pace (assumption): at about 50 orders a month and a 20 to 30% response with one reminder, expect 10 to 15 organic reviews a month. Seeding and past customers should take the six key beds to 5 reviews each within six weeks.

Photos, video and price presentation

Images do most of the selling on a phone, and the right price presentation makes your current prices feel smaller without cutting them, which is what you said you wanted on 9 October.

The 8-image standard (plus one video)

#	Shot	What it shows	Why
1	Hero	A size-matched real dog settling on the bed in a UK living room: wood floor, rug, natural light, three-quarter angle, square crop.	79% go to images first in home categories B5
2	15-second video	Dog walks in, circles and flops (5s) · a hand presses the foam and lets go, it recovers (4s) · cover unzipped, liner showing (4s) · end card "100 nights to decide" (2s). Captions, no sound needed.	No competitor shows foam recovery
3	In-scale	The dog lying as it sleeps, with outside size and sleeping area in cm overlaid.	42% judge size from images; 37% of sites have no in-scale shot B2, B3
4	Cut-away	Cross-section with each real layer labelled and its depth in cm.	Charley Chau is the only rival doing this
5	Step-in	An older dog stepping in; close-up of the front with the height in cm.	9 of 19 forum threads ask for low entry
6	Cover off	Cover unzipped, liner visible where fitted, 30°C label close-up.	Covers are the top product complaint
7	Underside	Non-slip base on a wood floor.	Slipping comes up in reviews
8	Size line-up	S, M and L side by side with breed silhouettes and dimensions.	Wrong size is the top fixable complaint

Order of shoot: Grasmere, Ambleside, Crummock Waterproof Nest, Langdale, Coniston, Nocturne, then the other memory foam beds. One day with two borrowed dogs (a spaniel and a Labrador cover most sizes) and a phone on a tripod by a window can do six beds. Only show layers, depths and features the bed really has, and give each image its own alt text.

Pricing levers that aren't price cuts

#	Lever	What to do	Evidence
1	Whole pounds	£149, not £149.00, everywhere.	E2
2	Per-night framing	One line on memory foam beds: "about 8p a night over the 5-year foam guarantee".	E1
3	Offer shown per size	"£15 off this size at checkout", applied automatically, with a real end date.	E9, F6
4	Threshold add-on	Spare cover offered to Small-size buyers to reach £129.	E9
5	Good, better, best	Three real beds per need, middle option as the natural pick.	E7
6	Order of the grid	Best sellers first, then high to low.	E6
7	The DIY comparison	Cot mattress (£50 to £75 before a cover) vs your bed, on chin rest, grip, liner, trial, guarantee.	Forums
8	Pay-in-3	Provider's own line under the price: "Or 3 payments of £49.67".	E12, F13
9	Worth it?	Years of guaranteed foam vs a cheaper bed bought again each winter.	Reviews
10	No fake anchors	No was-price unless it was genuinely charged immediately before.	F7

YOUR ORTHOPAEDIC PRICE LADDER (STARTING PRICES)

Tier	Beds
£69– £109	Chatsworth £69 · Langdale £99 · Buttermere £99 · Patterdale £99 · Haweswater £109 · Coniston £109
£129– £179	Windsor £129 · Ambleside £139 · Grasmere £149 · Borrowdale £149 · Nocturne £159 · Hartsop, Kendal, Loughrigg, Mungrisdale, Honister £169 · Lingholm, Esthwaite, Glaramara, Ennerdale £179
£189– £199	12 beds: Helvellyn, Melbreak, Braithwaite, Newlands £189 · Scafell, Staveley, Watendlath, Skiddaw, Skelwith, Bowfell, Easedale, Rosthwaite £199
£219– £259	Wastwater, Martindale £219 · Longsleddale £229 · Mardale £239 · Burnmoor £259

WHAT IT MEANS

- **Twelve beds start at £189 or £199.** On a phone they blur together. Each needs a distinct "Best for" tag, and some may sit better in their own collections than in "Orthopaedic".
- **Your two best sellers sit at £139 and £149.** That's the sweet spot for this traffic; lead with it.
- **Against competitors** (Large or flagship): George Barclay £69.99 to £89.99, Ralph & Co £97.99, Extreme Lounging £139.99, Lords & Labradors £154.99, Omlet £259, VetRelieve £270, Charley Chau £300. You sit mid-premium, below the three dearest, with a better trial than all of them. Say it through the offer, not by naming them.

Large bed price and return terms, as listed on 10 Oct 2026 (UK sellers only)

FunnyFuzzy · 14 days, you pay return postage		£69.99
George Barclay · 28 days, you pay (£89.99 with topper)		£69.99
Ralph & Co · 30 days, you pay		£97.99
Extreme Lounging · 14 days, unused only		£139.99
Lords & Labradors · 30 days, resaleable only		£154.99
PawLunova Coniston L · 100 nights, free collection		£179
Omlet Topology (built) · 180 days, free returns		£259
VetRelieve OrthoLuxe · 14 days, you pay		£270
Charley Chau · 14 days, you pay		£300

Flagship orthopaedic or memory foam bed in Large, from each brand's own site (Section O8). Big Barker (US only) and LABONI (no UK store) left out. Return terms from each brand's policy page.

The positioning in one line

Mid-premium price, the most generous trial in the UK market, and the only stated foam density. You don't need to be cheaper; you need the page to make those three things impossible to miss.

Implementation plan

In order, with rough hours for one person. Shopify Horizon specifics where they matter. Tick through it.

DAYS 1–3 · PO · ABOUT 7 HOURS

- ☐ **Remove every rating and review count** (homepage hero, "Owner reviews", Our Story banner, collection header). Add the new-brand line. 30 min
- ☐ **Turn off "Only X left"** on the product page and product cards. Set real inventory, or untrack quantity on partner-shipped beds. 1 hr
- ☐ **One delivery promise:** decide own stock vs partner for each bed; update the bar, buy box, delivery accordion and "What happens after you order". Remove or rename "Next Day Delivery". 2–3 hrs
- ☐ **Create the product.foam template** without guarantee, per-night, 50kg/m³, liner and "year five" blocks; assign the 14 egg-crate beds. Remove the per-night line from collection cards. 1–2 hrs
- ☐ **Chat widget** in English, moved off the sticky bar. 15 min
- ☐ **Em dashes, copy bugs, size labels and order** (appendix list). 1 hr

WEEK 1–2 · P1 · ABOUT 3 DAYS

- ☐ Currency format without decimals (all four formats). 10 min
- ☐ Create the metafields below; fill them for the six key beds, then the rest of the orthopaedic range. 5–6 hrs
- ☐ Buy box rebuild: subtitle, per-night line, offer line, size cards with sleeping area, size help, delivery line, button, trust row, payment logos. 4 hrs
- ☐ "What's inside" spec card (snippet below). 2 hrs
- ☐ Description into collapsed sections, "Worth it?" block, repetition removed, Q&A block, five new FAQs, the owner line. 3 hrs
- ☐ Collection: "Start with how they sleep" row, card clean-up (hide hover image on mobile), chips to filter links, Search & Discovery filters, manual order, tiles. 5 hrs
- ☐ Review app, review policy page, day-14/21/60 requests. 2 hrs
- ☐ Microsoft Clarity (free) for mobile recordings and heatmaps. 15 min

WEEKS 2–6 · P2

- ☐ Photo and video shoot for the six key beds; upload with alt text. 1–2 days
- ☐ Apply for a second payment method with pay-in-3; add the provider's widget. varies
- ☐ Source spare covers; add the "Complete their bed" block and the Small-size threshold line. varies
- ☐ Size guide sheet with diagram; consider no size pre-selected (test). 2 hrs
- ☐ "Show more beds" button on collections. 30 min
- ☐ PageSpeed fixes: chat widget on tap, image sizes, unused apps. 2–4 hrs
- ☐ Seed 10–15 beds; ask past customers for reviews. ongoing

MONTHS 2–3 · P3

- ☐ Reviews filterable by breed size and age; stars on cards as beds pass 5 reviews.
- ☐ Google Merchant Center product ratings once you pass 50 reviews.
- ☐ Christmas last-order dates from 1 Nov, from your couriers' real cut-offs.
- ☐ Re-rank the collection monthly from sales.
- ☐ Titles that lead with who it's for; handle tidy only with 301 redirects.

Horizon notes

Second template: Online Store › Themes › Customize › Products › Create template, name it "foam", base it on the default product template, remove the blocks, save. Then set Theme template to "foam" on each of the 14 beds.

Conditional blocks: Horizon blocks can't hide themselves based on data, so use a Custom Liquid block for anything conditional (snippets below), or the two-template approach.

Filters: install Shopify's Search & Discovery app, add each metafield as a filter, remove Availability.

Metafields to create

Settings › Custom data › Products (and Variants). Namespace `custom`. Fill from the bed itself or the supplier sheet, never from memory.

Key	Type	Example	Drives
subtitle	Single line text	A low step in for stiff legs, memory foam to settle into...	PDP subtitle
best_for	Single line text	Stiff mornings	Card tag, PDP chip
core_type	Single line text, choices	Memory foam · Egg-crate foam · Crumb memory foam · Fibre	Spec card, card chip, filter
foam_guarantee	True or false	true	Per-night line, trust row, comparison row
density_kg_m3	Integer	50 (only with a spec sheet)	Spec card, density block
foam_depth	Single line text	S 6cm · M 8cm · L 10cm	Spec card
feel	Integer 1–5	3	Spec card
has_liner	True or false	true	Bullet, spec card, filter
cover_type	Single line text	Zip-off fabric · Coated, wipe clean	Care line
wash_temp	Integer	30	Bullet, spec card
non_slip	True or false	true	Bullet, filter
low_entry	True or false	true	Bullet, filter, chip
entry_height_cm	Integer	measure	Spec card
sleep_style	List of single line text	Curls up; Head on the edge	Filter, Start-here links
shape	Single line text, choices	Bolster & sofa · Mattress · Nest · Corner & chaise	Filter
ships_from	Single line text, choices	Own stock · Partner warehouse	Delivery line
dispatch_days_min / _max	Integer	0 / 2	Delivery dates
variant: sleep_area	Single line text	62 × 50cm	Size cards
variant: suits_breeds	Single line text	Cocker, Springer, Border Collie, Staffie	Size cards
variant: suits_weight	Single line text, choices	Up to 10kg · 10–25kg · 25–40kg · 40kg+	Size cards, weight filter

Two snippets to paste into Custom Liquid blocks

PER-NIGHT LINE

product information section

```
{%- liquid
  assign v = product.selected_or_first_available_variant
  assign pence = v.price | times: 1.0 | divided_by: 1825 |
  round
-%}
{%- if product.metafields.custom.foam_guarantee.value -%}
  <p class="pl-night">That's about {{ pence }}p a night
  over the 5-year foam guarantee</p>
{%- endif -%}
```

Prices are stored in pence, so £109 gives 10900 ÷ 1825 = 6.
Check that it updates when you change size.

"WHAT'S INSIDE" SPEC CARD

under the bullets

```
{%- assign m = product.metafields.custom -%}
<div class="pl-spec"><h3>What's inside</h3><dl>
  {%- if m.core_type != blank -%}<dt>Core</dt><dd>{{
  m.core_type.value }}</dd>{%- endif -%}
  {%- if m.foam_depth != blank -%}<dt>Foam depth</dt><dd>{{
  m.foam_depth.value }}</dd>{%- endif -%}
  {%- if m.density_kg_m3 != blank -%}<dt>Density</dt><dd>{{
  m.density_kg_m3.value }}kg/m³</dd>{%- endif -%}
  {%- if m.feel != blank -%}<dt>Feel</dt><dd>{{ m.feel.value
  }} of 5</dd>{%- endif -%}
  <dt>Waterproof liner</dt><dd>{% if m.has_liner.value %}Yes,
  under the cover{% else %}No{% endif %}</dd>
  {%- if m.wash_temp != blank -%}<dt>Cover</dt><dd>Zips off,
  {{ m.wash_temp.value }}°C wash</dd>{%- endif -%}
  {%- if m.entry_height_cm != blank -%}<dt>Step-in
  height</dt><dd>{{ m.entry_height_cm.value }}cm</dd>{%-
  endif -%}
</dl></div>
```

Measuring it

At about 80 mobile sessions a day, orders are too few to judge week to week. Add-to-basket rate moves faster and is the number to watch.

Mobile metric	Now	Week 2	Week 6	Week 12	Source
Add-to-basket rate	5.6%	7.5%	9%	11%	Shopify sessions, device = mobile
Reached checkout ÷ added	71%	71%	71%	71%	Shopify
Paid ÷ reached checkout	54%	55%	58%	64%	Shopify
Conversion rate	2.2%	2.9%	3.7%	5.0%	Add rate × 71% × paid rate
Orthopaedic collection add rate (landing)	1.4%	4%	6%	7%+	Landing page report
Genuine reviews live	0	5	30	50+	Review app
Beds with 5+ reviews	0	1	6	12	Review app
Delivery complaints and chargebacks	track	0	0	0	Inbox, Revolut

WEEKLY 15-MINUTE REVIEW

- 1

Shopify: mobile funnel (sessions, added, reached checkout, paid) and landing-page add rates for the collection and the six key beds.
- 2

Clarity: watch 10 mobile recordings that reached a product page and left. Look for taps on size cards that do nothing, gallery swipes, how far people scroll before leaving.
- 3

Inbox: count size questions, delivery questions and trial returns, with reasons. Size questions falling is a sign the size cards work.
- 4

Payments: any dispute or chargeback, and its reason. One delivery dispute means the promise is still wrong somewhere.

WHAT TO TEST, AND WHAT NOT TO

Spotting a jump in add rate from 5.6% to 8.4% needs about 1,300 mobile sessions per version: roughly five weeks of a 50/50 test at today's traffic. Spotting conversion moving from 2.2% to 3.3% needs about 3,500 per version, roughly three months.

So: ship the PO and P1 changes as one batch (they're evidence-backed fixes, not guesses) and compare two-week windows on add rate. Save real A/B tests for genuine judgement calls:

- No size pre-selected vs Small pre-selected (PDP-09).
- Order of the four "Start with how they sleep" cards.
- Per-night line on vs off for £169+ beds.

If the collection add rate is still under 3% two weeks after P1, look at the first screen in Clarity before changing anything else: the Start-here row may be pushing the grid too far down.

Appendix

A. Claims audit of all 37 orthopaedic beds · B. Size-label fixes · C. URL handles · D. Limits of this audit · E. Sources.

A. Claims audit: the 37 beds in "Orthopaedic Dog Beds"

Core type and liner are taken from each bed's own description summary (Shopify, 10 Oct). "Not in summary" means check the full description and the bed itself before setting `has_liner`. Every one of the 37 cards currently shows the 5-year per-night line; the "Guarantee?" column says whether your refund policy actually covers it.

#	Bed	Core, per its description	Liner	Guarantee?	Action
1	Scafell XL Sofa	Profiled egg-crate foam base	Yes	No	foam template
2	Lingholm Velvet Sofa	Gel memory foam, 7.5cm	Yes (TPU)	Yes	keep
3	Mardale XXL	Memory foam over egg-crate	Not in summary	Yes	check liner
4	Staveley	Memory foam with egg-crate layer	Yes	Yes	keep
5	Wastwater	Deep memory foam	Yes	Yes	keep
6	Watendlath Velvet	Memory foam over egg-crate	Not in summary	Yes	check liner
7	Ennerdale	Gel memory foam, 24cm	Not in summary	Yes	check liner
8	Grasmere Sofa	Memory foam	Not in summary	Yes	check liner
9	Langdale	Orthopaedic foam, foam rim	Not in summary	No	foam template
10	Ambleside	Memory foam over firmer foam	Not in summary	Yes	check liner
11	Nocturne	Profiled egg-crate foam	Yes (membrane)	No	foam template
12	Bowfell XXL Chaise	Layered foam, egg-crate top	Not in summary	No	foam template
13	Esthwaite Chaise	Layered foam, egg-crate top	Not in summary	No	foam template
14	Rosthwaite	Memory foam over egg-crate	Not in summary	Yes	check liner
15	Mungrisdale Crate	Egg-crate foam, 9cm	No	No	foam template
16	Loughrigg Velvet	Egg-crate foam	Yes (layer)	No	foam template
17	Honister All-Weather	Egg-crate foam, up to 9cm	Coated cover	No	foam template; wipe-clean care
18	Skiddaw XXL	Egg-crate memory foam	Yes	Yes	keep
19	Glaramara Sherpa	Egg-crate foam	No	No	foam template; fix buy box
20	Hartsop Chaise	Egg-crate memory foam top	Yes (film)	Yes	keep
21	Windsor Sofa	Memory foam base	Not in summary	Yes	check liner
22	Chatsworth	Crumb memory foam	Not in summary	Yes	say "crumb" on spec card
23	Haweswater Sofa	Memory foam	Not in summary	Yes	check liner
24	Buttermere	Memory foam, 10cm	Not in summary	Yes	check liner
25	Coniston	Memory foam	Yes	Yes	keep
26	Kendal Corduroy	Memory foam	Not in summary	Yes	check liner
27	Borrowdale	Memory foam	Yes	Yes	keep
28	Melbreak	Memory foam with egg-crate layer	Yes	Yes	keep
29	Braithwaite Chaise	Profiled egg-crate foam	Yes	No	foam template
30	Burnmoor XXL Sofa	Profiled egg-crate foam	Yes	No	foam template
31	Easedale XL Sofa	Profiled egg-crate foam	Yes	No	foam template
32	Helvellyn Corner	Profiled memory foam base	Yes	Yes	keep
33	Longsleddale XXL	Memory foam with egg-crate layer	Not in summary	Yes	check liner
34	Martindale	Memory foam over egg-crate	Not in summary	Yes	check liner

#	Bed	Core, per its description	Liner	Guarantee?	Action
35	Newlands Sofa	Profiled egg-crate foam	Yes	No	foam template
36	Patterdale Tweed	Foam core	Not in summary	No	foam template; fix size labels
37	Skelwith Nest Sofa	Memory foam over egg-crate	Not in summary	Yes	check liner

Totals: 23 beds described as memory foam (guarantee applies), 14 egg-crate or foam beds (highlighted, guarantee doesn't apply). The 50kg/m³ figure should appear only where a supplier sheet backs it.

B. Size-label fixes

Bed	Now	Change to
Ennerdale	XL · 114 × 89 × 24cm, then Large · 91 × 69 × 24cm	Large · 91 × 69cm, then XL · 114 × 89cm (depth on the spec card)
Ambleside	Extra Large · 140 × 100cm	XL · 140 × 100cm
Nocturne	Extra Large · 107 × 76 × 19cm / Grey	XL · 107 × 76cm, colour as its own option
Glenridding	Large, Medium, Small	Small, Medium, Large
Haweswater	XL (no dimensions)	XL · L × W cm
Patterdale	Medium: Springer Spaniel Cockapoo Staffie	Medium · L × W cm, breeds in the size-card text
Elterwater, Eskdale, Kentmere Houndstooth	"Small: Pug French Bulldog Dachshund" style	"Small · L × Wcm", breeds in the size-card text
Kendal Corduroy	beige · gray · green	Beige · Grey · Green
Crummock Herringbone	Small / Herringbone grey	Small · L × W cm, colour as its own option

C. URL handles that carry another bed's name

Low priority. Don't rename these without 301 redirects, because ads and Shopping use them.

Handle	Product now
the-kentmere-orthopaedic-bolster-dog-bed	Staveley Orthopaedic Bolster Dog Bed
the-loweswater-orthopaedic-bolster-dog-bed	Melbreak Orthopaedic Bolster Dog Bed
wasdale-xxl-orthopaedic-sofa-bed	Burnmoor XXL Orthopaedic Dog Sofa Bed
kendal-quilted-dog-mattress	Glenridding Quilted Dog Crate Mattress
buttermere-boucle-nest-dog-bed	Blea Tarn Bouclé Nest Dog Bed
coniston-waterproof-nest-dog-bed	Crummock Waterproof Nest Dog Bed
the-grizedale-orthopaedic-bed	Grizedale Geometric Dog Mattress (not described as orthopaedic)

D. Limits of this audit

- No phone screenshots.** The browser was declined and this workspace can't reach your site, so layouts and screen breaks are inferred from the live page code in order. Check the wireframes against your own phone.
- Cached pages were excluded.** Some page reads returned older versions of your site (old product names and prices); only reads that matched current Shopify data were used.
- Expanders:** the "How we worked this out" maths may sit behind a tap; the summary line itself is still long on a phone.
- Small sample:** 9 days, 602 mobile sessions, 13 mobile orders. Direction, not proof.
- Competitor pages** were read as text; anything loaded by script (stars, BNPL lines, sticky bars) may be missing and is marked n/d.
- Reviews:** Amazon UK and Reddit block automated reading; Trustpilot star filters were blocked, so keyword filters were used, which can over-sample matching reviews. Counts are approximate.
- Benchmarks move.** Littledata snapshot of 7 Oct 2026; IRP Commerce August 2026.
- Product facts** (foam type, liner, depth) come from your own descriptions. Confirm against supplier sheets before publishing numbers.
- Not legal advice.** The UK rules cited are from CMA, ASA and FCA guidance as published; get advice on anything borderline.
